IN THE MATTER OF CHANGING THE MEASURING }
DEVICE REQUIREMENT FOR PERMIT NO. 32-7065 }

ORDER

WHEREAS, the above numbered permit was approved with the condition that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works; and,

WHEREAS, on July 1, 1978, the Department adopted a new water measurement condition which states: "An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department"; and,

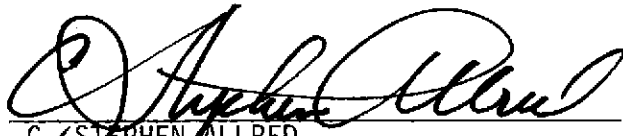

WHEREAS, the former condition required the permit holder to purchase and install a measuring device or hire a professional engineer to certify the rate of diversion; and,

WHEREAS, the measuring device condition effective July 1, 1978, requires less capital expenditure by the permit holder; and,

WHEREAS, to be equitable to holders of permits issued prior to July 1, 1978, the new condition should be retroactive;

NOW THEREFORE, it is hereby ordered that the condition of approval of this permit related to water measurement is hereby changed as follows: "The permit holder shall either install a measuring device or provide a certified measurement by a professional engineer or install an access port or other device as specified by the Department".

MEMORANDUM

TO: FILE

FROM: JIM JOHNSON

RE: CHANGING THE RATE OF FLOW ON PROPOSED LICENSE

DATE: 3-OCT-1988

=====

When this file was first reviewed for license processing the rate of flow was recommended at 1.60 cfs.

This recommendation was based upon dividing the total number acres into the capacity of the diversion works.
($3.21\text{cfs}/256\text{acres} = 0.0125\text{cfs/acre}$)

The rate per acre was then multiplied by the number of acres irrigated by system used under this permit.
($0.0125\text{cfs/acre} \times 128\text{acres} = 1.60\text{cfs}$)

This method of determining rate of flow has been revised and further review is now included as part of the licensing process.

Under the new method, if the diversion system used supplies water to two pivot circles and if water can be regulated and diverted to only one circle at a time then the rate of flow should not be limited by using an average rate of flow as was done above. The rate should be based either upon the maximum rate/acre allowable (0.02cfs/acre) or if information is available upon the actual rate diverted to the one circle.

In this case the actual amount diverted to one circle is not known so the rate of 0.02cfs/acre is recommended.
($0.02\text{cfs/acre} \times 128\text{acres} = 2.56\text{cfs}$)

This method of determining rate of flow for a license requires the use of condition:

<<R17>> The maximum combined rate of diversion when this right is used together with Right No. 32-7064 shall not exceed 3.21 cfs.

NOV 22 1988

The permit needed amending prior to licensing and the amendment application was sent to the permit holder using the old rate of flow method. The Amendment application has been received. Since the rate of flow for the right is now greater than listed on the amemdment application an adjustment was made to the application rather than returning a new application to the permit holder.

Dear Mr. Bond:

On February 23, 1988, we sent you a request for "Assignment" of the above referenced permit to change the name of this right to Neal Sauer. As of this date we have not received the assignment form and have not heard from you in regard to this matter. Enclosed you will find a copy of our February 23 correspondence.

Please be advised that if you have decided not to assign this permit to Mr. Sauer, you need to submit the \$20.00 amendment fee at your earliest convenience. If the amendment fee is not submitted, we will have no alternative but to void the permit from our records. The reason for the requested amendment is the point of diversion described on the permit and the point of diversion that was developed are in different 40-acre tracts. If the permit is not amended, we cannot license use of the system since it differs from the proposal under the permit.

If we have not received either the assignment or the amendment fee on or before May 30, 1988, we will recommend this permit be voided. Your prompt attention to this matter would be greatly appreciated.

Sincerely,

RE: LICENSING AMENDMENT - 32-7065
Date: May 17, 1988

Mr. Neal Sauer visited this office on May 12, 1988. At that time I was out of the office but he left several aerial photos, I guess to help me in making his filing.

In reviewing the photos, I came across a sealed envelop with a check for \$20 for the licensing amendment for 32-7065. Mr. Sauer had not advised me about the check. To expedite matters, we are going to receipt the check in this office. Hope this delay does not cause a problem for you.

Dear Mr. Bond:

In response to the Department's correspondence of December 29, 1987, we have received the licensing amendment for the above referenced permit. However, we did not receive the \$20.00 filing fee which must also be submitted.

We also received a hand written note which requests that we make a name change on this permit. We have enclosed a partially completed assignment of permit form for your convenience. This form must be signed by you in the presence of a notary public, and returned to our office for processing. There is no fee for the submittal of this form.

Once we receive the assignment of permit form, we can request that Mr. Sauer submit the fee for the licensing amendment since this permit will then be his property.

If you have any questions regarding this matter, please feel free to contact our office.

Sincerely,

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water

right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Dear Mr. Baker:

Enclosed are copies of your approved Applications for Permits as referenced above. We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain measuring devices at your points of diversion has been placed upon your permits. We are enclosing a letter describing different types of measuring devices accepted by this office.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights
