In the Matter of Application for Permit No.)
32-7010 in the name of HOLLIS I. SHENTON)

MEMORANDUM DECISION
AND ORDER

On April 5, 1971, Hollis I. Shenton applied to the Department of Water Administration for a permit to appropriate 6.40 cubic feet per second of water from Medicine Lodge Creek from a point within the $SE\frac{1}{4}NW\frac{1}{4}$ of Sec. 25, Twp. 11 N, Rge. 34 E, B.M., Clark County, to be used for irrigation purposes within the $W\frac{1}{2}NE\frac{1}{4}$, $SE\frac{1}{4}NE\frac{1}{4}$, $E\frac{1}{2}NW\frac{1}{4}$, $E\frac{1}{2}SE\frac{1}{4}$, Sec. 1; $SW\frac{1}{4}SW\frac{1}{4}$, Sec. 6; Twp. 10 N, Rge. 34 E, B.M. (320 acres).

The Department caused notice of the application to be published in the Clark County Enterprise at Dubois, Idaho, on May 13 and May 20, 1971. On May 27, 1971, the Department received a protest, in petition form, from the majority of water users in Water District 32-C. As a result of that protest, a conference was held on April 20, 1972, at the Clark County Courthouse in Dubois, Idaho.

At the above mentioned conference, the protestants set forth the following reasons why said application should not be approved:

- (1) This water has been used for years by the protestants who have paid the watermaster's expenses for its delivery and there is no excess water.
- (2) The early run-off has been used to saturate the meadows in the upper reaches of Medicine Lodge Creek which delays the flow of water for later use by the downstream users.
- (3) A new permit would mean an additional cost for administration of the water by the watermaster.

Medicine Lodge Creek water users are divided into two groups. The upper users claim a water right has been established by diversion and beneficial use. The lower users have water rights established by decree, Robson vs. Colson, or the statutory procedure, and are controlled by the watermaster of Water District 32-C.

The location of the applicant's proposed point of diversion is downstream from the protestants diversions. During the early part of the year and at times during the irrigation season water does reach the proposed point of diversion and, therefore, with

32-7010

respect to the protestants rights, would be available for appropriation.

The right claimed by the upper users of Medicine Lodge Creek for the diversion of large quantities of water to saturate their meadows prior to the irrigation season has not been adjudicated by the courts and, as such, cannot be recognized by the Department as a beneficial use of water. The Supreme Court of this state has held that water must be used beneficially and with reasonable efficiency in the method of application. Until such time as a court of law has determined that such large quantities in excess of the statutory maximum are necessary, this Department is limited in prefecting such a right. At such time as these rights are found to exist by the court, any subsequent right would be subject to their continued use.

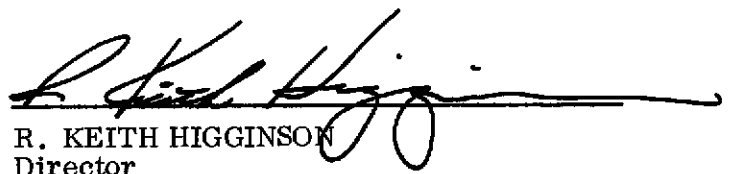

Present statutes governing water distribution require that each person pay his portion of the watermaster's expenses according to the number of 24-hour second feet of water delivered to him during the water year. An anticipated increase in cost of distribution to prior users, as a result of new users, has been previously determined by the courts to not be an adequate basis for denial of a new appropriation. Each new appropriator must pay his share of all costs.

After having considered all available information, the Director of the Department of Water Administration finds that the protests against the approval of Application for Permit No. 32-7010 should be set aside; and,

THEREFORE, IT IS HEREBY ORDERED that Application for Permit No. 32-7010 be APPROVED subject to the following conditions:

- (1) Subject to all prior water rights.
- (2) That proof of construction of works and application of water to beneficial use be submitted to the Department on or before October 1, 1977.
- (3) That a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works.
- (4) That the diversion of water be subject to the control of the Water-master.

Dated this 8 day of September, 1972.

Hollis Shenton
Box #33
Dubois, Idaho 83423

Dear Mr. Shenton:

You indicate stockwater on your proof card but your permit does not include stockwater. That being the case, you may want to file a separate application for stockwater.

We acknowledge receipt of the proof of beneficial use card submitted for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions regarding the field examination, please contact our eastern regional office.

Very truly yours,

JOHN D. CARLSON
Sr. Resource Agent

RE: Permit No. 32-7010

Mr. Stephen Allred, Director
Dept. of Water Resources
Statehouse
Boise, Idaho 83720

Dear Mr. Allred;

Regarding permit # 32-7010, I would like to ask for an extension of time to complete the proof of beneficial use.

Although I have made beneficial use on a large portion of lands under this permit, I still have some lands which are not completed. Our plan was to complete this work last season, however the drought has made delivery of water limited enough this year to not complete.

Delivery this year in particular was very small, but the two preceeding years was very good.

I should like a two or three year extension, because if this drought should continue it may take that long to complete the beneficial use.

Sincerely;

Hollis I. Shenton

Re: Permit No. 32-7010

Hollis I. Shenton
Dubois, Idaho

Dear Mr. Shenton:

One of the conditions of approval of your water Permit No. 32-7010 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before October 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

A conference was held on April 20, 1972, in Dubois, Idaho, to consider the protest against approval of Application No. 32-7010.

The roster of attendance indicates the protestants that represented themselves. Hollis I. Shenton, the applicant, was represented by his son, Dean Shenton.

The matter of the protest was discussed and the main objection appears to be whether the approval would require that water be released by up-stream users who are now diverting under a use right. The up-stream users, as a common practice, divert the flood waters into their meadows, which the down-stream users feel supply water for their use later in the season as the water percolates back to the stream.

The protestants and the applicant agreed to authorize the Department of Water Administration to reach a decision based upon the information contained in the records of the Department. A Memorandum Decision should be written as soon as possible.

Re: Application for Permit No. 32-7010

Mr. Hollis I. Shenton
Dubois,
Idaho 83423

Dear Mr. Shenton:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 32-7010. You should be aware that the following are the only items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water, or an annual amount of 5 acre feet of water per acre of land, unless the applicant can show that more is required due to soil or climate conditions. (Section 42-202, Idaho Code)

The waters intended to be appropriated must be public water of the State of Idaho. If private waters, as defined under Section 42-212, Idaho Code, the applicant must have authority to divert the water from the owner of the land on which the water lies.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish right-of-ways over private or governmental lands. Right-of-ways or easements must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a hearing and/or conference to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

We are in receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the only items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish right-of-ways over private or governmental lands. Right-of-ways or easements must be obtained by the individuals concerned through action outside of the water right proceedings.
