CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The rate of diversion of water for irrigation under this license and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.

MEMORANDUM

DATE: May 4, 1995
TO: File no. 31-07606
FROM: Cindy Zimmerman
SUBJECT: Licensing Review

=====

This permit represents a portion of 32-07022G that was amended and moved to basin 31 in Blaine Larsen's 1995 Transfer/Amendment group.

Permit no. 32-07022G was field examined August 4, 1983, establishing acre and rate of flow limitations. Refer to 32-07022M (the remaining portion of 32-07022G) for the exam.

Volume limitations were imposed by the protest agreement between Blaine Larsen and protestants dated 4/13/95.

Licensing of this right is based upon the field exam of 32-07022G and the protest agreement.

RE: Approved Transfer and Amendment Applications

Dear Jim:

Enclosed are 21 approved transfer applications and 9 amendment of permit applications covering approximately 3200 acres.

All of the points of diversions associated with the water rights listed must have department approved measuring devices installed. I am sending you 1995 Reporting Forms for each diversion listed on the enclosed water rights. The form must be completed during 1995, and returned to the Department on or before January 15, 1996.

Also enclosed are Water Measurement Certification forms for 1995. Please fill in the meter and piping information on the front page.

If the meter was installed after December 8, 1994, you must sign the form at the bottom of the first page, verifying that the meter was installed according to both the Department's and the manufacturer's specifications.

If your meter was installed prior to December 8, 1994, you must calibrate your meter, and complete the back page of the Water Measuring Device Certification form. The Department will accept calibration by a second metering device (such as a sonic meter, or pitot gauge), a volume-time measurement (such as timing how long it takes to fill a fixed volume bucket at representative locations), or a comparison of a chemical or dye concentration before and after it is injected into a delivery system. If you wish to calibrate using any method other than another measuring device, please contact the Department for proper standards.

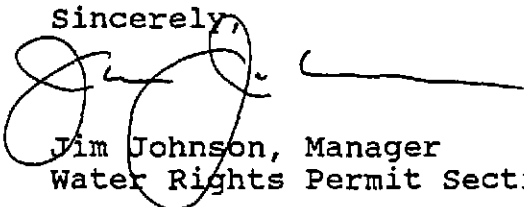

Once you've completed the Measuring Device Certification Form, you may send it to the Department immediately, or send it with the annual report. You will only be required to calibrate your meter once every four years, unless the meter is replaced or you know it is not reading accurately. Remember that although the meter must only be calibrated every four years, you must keep it in good repair, and read and report your diversions every year.

DEC 20 1995

As per agreement annual volumes are restricted to the amounts identified on each approved transfer. You should maintain records that show the five year rolling averages for each diversion and a five year rolling average for all of the water rights identified in the enclosed set of approvals.

If you have any questions let me know.

Sincerely,

Jim Johnson, Manager
Water Rights Permit Section

Subject: Conditions for annual diversion volume

=====

Each water right needs a general condition which identifies that a five year average for total volume allowed under the group of transfers and amendment of permits shall not exceed 7540 acre feet.

This group of filings consist of 23 transfer applications and 9 applications for amendment of permits, covering a total of 3200 acres.

The condition should read as follows;

This right when combined with the following rights shall not exceed 7,540 acre feet per year when averaged over a rolling five year period.

Each right identified in the group above shall be limited to an annual volume identified in attachment A.

The condition should read as follows;

The five year average annual volume diverted under this right shall not exceed XXX.X acre feet.

If more than one water right is used on the same land the condition should read as follows;

The five year average annual volume diverted under this right shall not exceed XXX.X acre feet and when combined with right YY-YYYYY shall not exceed XXX.X.

A totalizing measuring device of a type approved by this Department shall be maintained as a part of the diverting works and made accessible to inspection by pertinent parties. The right holder shall provide an annual summary of pumping volumes to the Department, ~~as public record.~~
