TO Bob Fleenor

SUBJECT PERMIT NO. 31-7030, 31-7031, 31-7032, 31-7033

Mr. Hillman and Mr. Robertson were the two guys to whom I indicated that there might be a possibility of the Department accepting a certified measurement in fulfillment of the measuring device requirement. While they were in the office requesting extensions of time, they indicated that they had ordered the measuring devices and were planning to install them for their own use. It appears that they want to keep all of their options open, because they also included a letter from Mel Brown indicating he has been contacted about making the certified measurement.

Dear Sir:

Ralph Hillman and Dyle Robertson have contracted with Mel Brown Co. to provide certified measurements or satisfactory measuring devices on three irrigation wells near Hamer, Idaho in order that they may comply with your regulations and obtain finalization of their water rights. We may, however, need additional time beyond their deadline to complete this job because of the unfavorable weather we have been having, if they need a size or model meter we don't have in stock, or if the backlog of other work we have creates scheduling problems.

We will of course complete this job as soon as possible so you can complete their application and close your files. We would appreciate your consideration on their behalf in this matter.

Very truly yours,

V.M. Brown, PE

Gentlemen:

One of the conditions of approval of your water Permit No.'s 31-7030, 31-7031, 31-7032 and 31-7033 (see last page of your approved permits) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1975. Enclosed are affidavit forms which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable causes as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted for the permits.

Either the beneficial use affidavits, or requests for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permits will lapse and be of no further force or effect.

Gentlemen:

Through a cooperative arrangement with the well drillers licensed in Idaho, notice is supplied to this agency prior to the construction of wells drilled in connection with exploration for groundwater.

We were notified that you are constructing a well located in Twp. 7N, Rge. 37E, B.M., Sec. 8, SE $\frac{1}{4}$ SW $\frac{1}{4}$. We have reviewed our records, and the preliminary check has failed to indicate that you have filed an application with this agency. If we have overlooked your permit, please advise us of the number by return mail. If you have indeed not filed an application for permit, and your diversion is other than a single family domestic unit and producing less than 13,000 gallons/day, then you are required to file an application before construction starts and receive a valid permit from this agency before groundwater may be diverted.

Idaho has been under a mandatory permit system for groundwater since March 25, 1963: Reference: Carl Tappin, State Reclamation Engineer, v.s. Clyde Smith and Bonny Smith, Idaho Supreme Court, 1967. Therefore, it is held by this agency as an illegal act to divert groundwater without the aid of a valid permit or a license on appropriations with a priority junior to March 25, 1963 for other than excluded above.

We will supply you with an application for permit and instructions if you so request. Please contact us for forms or if we can be of any service.

Very truly yours,

Gentlemen:

We are returning your personal checks, in the amount of \$50 each, totaling \$100, and your original two applications for permit. As the State Reclamation Engineer has agreed to return the original applications and filing fees and allow you to submit new filing fees, you should be advised that the replacement applications, which we have reviewed, will require filing fees totaling \$160. The basis for this fee is as follows: 6.4 c.f.s., \$50; 4.8 c.f.s., \$40; 3.2 c.f.s., \$35; and 3.2 c.f.s., \$35. We are also returning your replacement applications. We would further request that on the applications, where the point of diversions are listed as the middle of a quarter section of ground, that this point of diversion be identified to a particular 40-acre tract. Our record keeping system is not designed to hold descriptions such as middle of a 160-acre tract.

Your assistance in clarifying these issues will be appreciated.
