Dear Mr. Bloom:

Your check has been received for licensing the above numbered permits. However, on July 28, 1961 we wrote Mr. Wells concerning Permit G25776 and explained that our examiner had found the point of diversion to be in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 33 rather than the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 34 as listed on the permit, and asked him to complete an amendment form and return to this office with his fees for license. We have not received the amendment as of this time.

On Permit G27575, we wrote on July 30, 1963 requesting that an amendment to the land list be forwarded if he wanted the S $\frac{1}{2}$ SE $\frac{1}{4}$, Section 30, N $\frac{1}{2}$ N $\frac{1}{2}$ SE $\frac{1}{4}$, Section 31; N $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 32, all in T8N-R3EEM included in the permit. This land was not listed on the original application. If this land is to be included, the fees for license would be \$35.00; if it is to be left off--the fees will only be \$21.00.

Since neither amendment has been received we are enclosing forms for completion. The fees for recording will be \$2.00.

Please return the amendments promptly in order that the licenses can be issued.

Re: Permit No. G-27575

William H. Roundy

Dear Mr. Roundy:

Our field engineer's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. G-27575 shows the well is (~~206~~) capable of conveying 206 miner's inches, or 4.12 c.f.s. of water for the irrigation of 540 acres.

Upon receipt of the statutory fees, totaling \$ 35.00 , which consists of a Completion of Works fee of \$5.00 and License and Certificate of Water Right fee of \$ 30.00 - based at the rate of \$2.00 for each 40-acre subdivision - we will issue the Certificate of Completion of Works and the License and Certificate of Water Right confirming the right, with priority of September 22, 1958 to the use of 4.12 second feet of subterranean water with the point of diversion in the SW¹/₄ NW¹/₄, Sec. 32 for irrigation of 540 acres in the S¹/₂ SE¹/₄, Sec. 30; NE¹/₄, NW¹/₄ SE¹/₄, Sec. 31; NW¹/₄, NE¹/₄ SW¹/₄, SE¹/₄ SW¹/₄, Sec. 32, T. 8 N., R. 33 E., B.M.

Since your permit does not include the S¹/₂ SE¹/₄, Sec. 30; NW¹/₄ SE¹/₄, Sec. 31; NE¹/₄ SW¹/₄, SE¹/₄ SW¹/₄, Sec. 32, T. 8 N., R. 33 E., B.M. it will be necessary to amend the land list if you want the extra land included in the license. Complete the enclosed form, submit it with the above mentioned statutory fees, plus an additional fee of \$1.00 for recording the amendment, to this office and the License and Certificate of Water Right will be issued as shown above.

If you do not want the extra land included the fees will total \$21.00 and the land list will be restricted to the lands shown on the permit which are actually irrigated.

RE: Permit No. G-27575

William H. Roundy
Montevieu, Idaho

Dear Mr. Roundy:

As requested in your letter of March 15 we are enclosing forms for the legal notice of intention to prove completion of works and beneficial use of the water, and authority for this office to have the notice printed. Also enclosed is form to apply for additional water from your well, with instructions for all forms.

I do not know the capacity of your well or the pump, however it is possible that the two places will not receive a water license for an equal amount of water per acre if you make two sets of proofs from the same well. Permit No. G-27575 was issued in connection with a Desert Land Entry and the date for making the proofs can be advanced five years from date of approval of the Entry or to the fall of 1964. If you could make proofs on the two permits at the same time, the amount of water could be equalized, or both permits could show all the land and each get the same amount with each priority. Your present permit would require an amendment to the land list, and the new application would show all the land.

The matter of equalizing the amount of water can also be handled later after the present permit is licensed, by a transfer of water right, if it is important.

Dear Mr. Roundy:

Final check on your application for subterranean water to irrigate the NE $\frac{1}{4}$ Section 31 and the NW $\frac{1}{4}$ Section 32, Township 8 North, Range 33 East, B.M., shows that the point of diversion on Page 1 is in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 32, while both maps show the well in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 32.

Please advise which is correct, and the correction will be made in this office.
