(late proof)
License of Water Right No. 31-2276 Priority January 17, 1969 Amount 10.0 cfs

THIS IS TO CERTIFY, that Owsley Canal Company
of Terreton, Idaho, has complied with the terms and conditions of Permit
No. 31-2276 issued pursuant to Application for Permit dated November 24, 1944,
and has submitted proof to the Department of Water Resources on March 20, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 27.92 cfs of water from wastewater,
tributary to Mud Lake, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

RE: Permit No. 31-2276

Owsley Canal Company
Terreton,
Idaho 83450

Dear Sir:

Enclosed is a copy of the amendment form and letter we had sent to you on July 23, 1982. We found that an error had been made on the legal descriptions locating the points of diversion under this right. The points of diversion described as being located within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ NE $\frac{1}{4}$ and SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 20, Twp. 6N, Rge. 34E, should have read Section 24 rather than Section 20.

We have corrected the original amendment and if we do not hear from you by November 1, 1982, we will assume you are in agreement with the said correction and a license will be issued.

If you have any questions please contact me at 334-4162.

Sincerely,

JIM JOHNSON

RE: Permit No. 31-2276

Owsley Canal Company
Terreton,
Idaho 83450

Gentlemen:

A representative of this Department made an examination of the works covered by your Permit No. 31-2276 and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 10.0 cfs Source: wastewater tributary to Mud
Lake

The maximum quantity diverted shall not exceed 44.3 acre feet per
year.

Point(s) of diversion: NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 4; NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 11; NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 13;
NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 16; SE $\frac{1}{4}$ SE $\frac{1}{4}$, SE $\frac{1}{4}$ NE $\frac{1}{4}$, SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 20; Twp. 6N, Rge. 34E,
NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 17; SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 19; NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 20; Twp. 6N, Rge. 35E,
Jefferson County

Beneficial use: Irrigation from April 1 to November 1 of 16,100 acres
(see attached land list).

Priority date established: January 18, 1969 (late proof)

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter. Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Sincerely,

JIM JOHNSON

The grid-in response area consists of a 36x36 grid. The columns are numbered 1 through 6 at both the top and bottom. The rows are numbered 1 through 36 on the left side. The grid is divided into two main sections by a horizontal line between row 5 and row 6. The top section (rows 1-5) contains 5 rows of 36 cells each. The bottom section (rows 6-35) contains 30 rows of 36 cells each. Each cell contains a small square for marking an answer. The grid is used for entering answers for the first section of the test (rows 1-5) and the second section of the test (rows 6-35).

Dear Merlin:

Reviewing the file of Permit No. 19588/31-2276 we find this was an application submitted many years ago to reclaim seepage water from your system. At that time there was no requirement that measuring devices be installed. Searching the files up to date, we do not find where you have been requested to install measuring devices. Therefore, the Department has not required you to install measuring devices on this particular permit.

If you have any further questions, please do not hesitate to contact me.

Very truly yours,

Re: Permit No. 19588/31-2276

Owsley Canal Company
Terreton,
Idaho 83450

Gentlemen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit. Enclosed is an Order which advances the priority under this permit to January 17, 1969.

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a permit holder to make proof of beneficial use of water. The enclosed Order modifies your permit to comply with these rules and regulations.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions concerning the field exam, please contact our Eastern District Office at 1515 Lincoln Road, Idaho Falls, Idaho.

Sincerely,,

D. Darlene Reich
Water Rights Supervisor

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

STATE OF IDAHO

DEPARTMENT OF RECLAMATION

BOISE, IDAHO

REPORT OF ENGINEER

Permit No. 19588

This proof is for Completion of works

In Water District No.

1. Name of applicant Owsley Canal Company, Terretton, Idaho
2. Source of water supply: Seepage and return flow from applicant's irrigation system
3. Location of point of diversion: Is in the Section line of Sections 10 & 15, 9 & 16, 8 & 17
T. 6 N. R. 34 E. County of Jefferson
4. Describe works as they exist, giving dimensions and capacities of same: Diversion consists of drainage water which normally discharges into a channel from Mud Lake at low water stage of lake and is then re-pumped from the Canal Company's intake canal at a point about $1\frac{1}{2}$ miles from the lake shore proper. The drain outlet is at an elevation between high and low water levels in the lake, thus requiring a flap type check valve at the end of the drain for the exclusion of high lake water, and later operation of the drainage system into the lake.
5. Water is used for: Irrigation
6. State whether or not water has been turned into works of diversion: Yes
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):
Land within the Owsley Canal Company project.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? None
- Remarks: The quantity of water available for this filing is problematical due to the fact that as constructed the drain can function only during that part of the season when the lake water level is lower than the discharge control at the point of diversion from the drain. To make this drainage available throughout the season, it would be necessary to pump over the dike between the lake and drain. Estimated $Q = 1$ c.f.s. at date, to facilitate measurement, and thus balance debit and credit as it affects other lake rights.

This examination was made on the 25 day of May, 19 49

Re: Permit No. 19588

Mr. Edwin Snow
Box 515
Boise, Idaho

Dear Mr. Snow:

As per our telephone conversation this morning, we are returning the forms enclosed in your letter of March 16, 1950, in connection with Beneficial Use Proof under Permit No. 19588 of the Owsley Canal Co.

We are also enclosing a list of the land shown in our record of this Permit, which you will note differs in some particulars from the description given in the notice, in that it includes some land not described in the Permit and does not include other tracts described in the Permit.

You understand, of course, that if any of the land is to be omitted that will be all right but if additional land is to be included, it will require an amendment to the original Permit before proof is made.

For your convenience we are enclosing additional copies of Form 10 and also an application for amendment to the land list.

Very truly yours,

RECEIVED
MAR 17 1950
Department of Reclamation

Hon. Mark Kulp,
State Reclamation Engineer,
Boise, Idaho.

Dear Mr. Kulp:

Enclosed herewith in duplicate is notice of proof by Owsley Canal Company of application of water to beneficial use under permit #19588, covering 10 second feet seepage and return flow waters. I would appreciate it if your office would fill in the blank in the first line of the notice fixing the date for such proof at such date in April as will allow time for the four weeks' publication required by law.

There has been some little delay in getting these papers back from the Owsley Canal Company. I am aware that since of necessity proof will be submitted later than the date specified in the permit, the priority of the right will be postponed by the length of time elapsing between the date the proof was due and the date proof is actually made. This, however, is immaterial since there are no intervening rights.

Also enclosed is authorization to your office for having the notice published in the Rigby Star at the expense of the applicant. I assume your directions to the Rigby Star will include the submission of proper affidavit of publication. The bill for the publication may initially be sent to me and I will forward it to the Owsley Canal Company for payment.

Thanking you, I am

Very truly yours,

Edwin Snow

Dear Sir:

We enclose herewith blank notice for proof of application of water to beneficial use under your Permit No. ~~19588~~. This notice should be filled out in duplicate and returned to this office at least 40 days before the date upon which you wish to make this proof, in order to allow time for the four weeks' publication required by law.

This proof must be submitted before a Notary Public or other officer authorized by law to administer oaths.

The date for proof, as set out in your permit, is not later than ~~April 12, 1950~~, and if proof is submitted later than said date, your priority will be brought down a length of time equal to the time elapsing between the date the proof is due and the date proof is actually made.

Gentlemen:

We have received from Mr. T. H. Lee, Notary Public, the depositions of the holder and the two witnesses also affidavit of publication in the Rigby Star all in proof of completion of works under Permit No. 19588.

Before a final action is taken in the matter the law requires that a field examination be made by an Engineer from this Department. We cannot say just when this examination will be made as we have but one Field Engineer who makes examinations all over the State.

However Mr. Tolman, Field Engineer for this Department, will try and contact you at the time he makes the examination in order that arrangements may be made to show him over the project.

Very truly yours,

PROOF OF COMPLETION OF WORKS

Re: Permit No. 19588 -Owsley Canal Co.

Mr. T. Harold Lee
Notary Public
Rigby, Idaho

Boise, Idaho, February 2, 1948

Dear Sir:

I enclose herewith the following forms to be used in connection with proof of completion of works under Permit No. 19588

Deposition of Permit Holder,
Depositions of Two Witnesses.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of the permit holder's rights:

1. On February 12, 1948, the date set for proof of completion of works, the enclosed deposition forms (one for permit holder and one each for two witnesses) should be filled out and sworn to, at Rigby, Idaho, before T. Harold Lee, Notary Public

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

MARK R. KULP

Re: Permit No. 19588

Mr. John L. Hutton, Manager,
Owsley Canal Company,
Terreton, Idaho

Dear Mr. Hutton:

We acknowledge receipt of your letter of December 14th, enclosing duplicate notice of completion of works proof to be made under Permit No. 19588 on February 12, 1948.

A copy of the notice will be sent to the Rigby Star, with instructions to publish it once a week for four consecutive weeks prior to that date, and to send the affidavit of publication, together with statement of costs, to the Owsley Canal Company.

It is not necessary to itemize the land list in this notice, and the statement you have made in the notice will suffice.

About ten days prior to the date set for proof we shall send to Mr. T. Harold Lee, the Notary Public, the necessary forms of deposition, consisting of one for the permit holder and one for each of two witnesses, so that he will have them in ample time for the proof.

At the time set a representative of the Owsley Canal Co. should appear before the Notary, together with two disinterested witnesses, who are familiar with the terms of the permit, and the works constructed thereunder for the purpose of executing the depositions.

Very truly yours,

19588

Dear Mr. Kulp:

I am inclosing herewith notice for publication required on Permit # 19588.

Please note that in Paragraph 6, I have set forth that intended use is for "Lands embraced by ----- Owsley Canal Company."

If this description is not specific enough, will you please strike that part, and attach copies of land description, which are inclosed herewith.

With best wishes, I am,

Very truly yours,

John L. Hutton
Manager.

STATE RECLAMATION ENGINEER:
TO THE ~~COMMISSIONER OF RECLAMATION~~

Boise, Idaho.

Dear Sir:

You are hereby authorized to have the attached notice published at my expense in the
..... Rigby Star of Rigby, Idaho , published in
the county in which the works are situated.

Owsley Canal Co.,

by John G. Hunter Mgr.

(In case of canals or other works designed to divert and carry more than 50 cubic feet of water

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Owaley Canal Company
C/o Edwin Snow
Box 515, Boise, Idaho

Boise, Idaho, **December 1, 1947**

Dear Sir:—

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 19588.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof **MUST** be on or before February 12, 1948. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

MARK R. KULP
