FROM: H. W. JONES

TO: RON CARLSON

RE: TRANSFER OF WR 31-00042

Blaine Larsen has proposed transferring WR 31-00042 from Beaver Creek to lands owned by Ken Torgenson. I have checked the rights involved and I have listed the findings and concerns below:

- 1) The Torgenson property already has WR 31-00122, 31-00123, and 31-07045 from Beaver Creek. The amounts and priorities are 0.8 cfs (5-1-1894), 0.8 cfs (5-02-1910) and 4.2 cfs (1-22-1971) respectively. All are used on the same 134 acres in Sec 33 T10N R36E.
- 2) Moving WR 31-00042 from its original place of use would not involve any unstacking of water rights, since there are no other water rights appurtenant.
- 3) WR 31-00042 claims excessive flows for the acres claimed. 4 cfs for 120 acres are claimed with a priority of 4-22-1913.
- 4) It appears the reasoning behind this transfer would be to get additional water early in the season when WR 31-07045 (priority 1-22-1971) has been cut to then supplement the 1.60 cfs of WR 31-00122 and 31-00123.
- 5) The transfer would bring 120 acres of WR 31-00042 to a place of use with 134 acres.
- 6) Note that Mr. Torgenson did not claim the full amount of right 31-00122. It does not appear that anyone else has claimed the rest of this right. WR 31-00123 (1.6 cfs) is claimed in part by Blaine Grover for 0.80 cfs under claim A31-00123A. Mr. Torgenson also claims 0.8 cfs under claim A31-00123.

Dear Mr. Frederickson:

Your protest against approval of the above referenced application for transfer has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protest. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application (Sec. 42-222, Idaho Code):

1. Are other water rights injured by the transfer?
2. Does the change constitute enlargement in the use of the original water right?
3. Is the change consistent with the conservation of water resources within the state of Idaho?
4. Does the change conflict with the local public interest?

The protestant must be prepared to present proof of allegations involving one or more of the four items.

If this office can be of further assistance, please contact us.

NOTE:

A protestant is required to timely file a protest with the department together with a \$25.00 protest fee for each application being protested in order for the protestant to be considered a full party by the department. In addition, the department's Rule of Procedure, IDAPA 37.01.01203, requires a protestant to send a copy of a protest to the applicant.

INSTRUCTIONS

1. The matter being protested must be clearly identified. A typical matter is identified by the application number such as "Application for Permit No. _____ in the name of _____" or "Application for Transfer No. _____ in the name of _____."
2. Show the name of the protestant. Only one (1) protestant may be shown per protest form. If this protest form is signed by more than one person, the hearing officer will consider the first signer as the official protestant and the representative for service of documents.
3. If the protestant is represented by an attorney or other authorized representative, show the representative's name. The department then will serve documents on the representative and upon the protestant if specifically requested.
4. Show the address where the department is to serve the documents. This should be the address of the authorized representative unless the protestant does not designate a representative.
5. Show the telephone number of the authorized representative unless the protestant does not designate a service representative.
6. Specifically describe the nature of the protest.
7. Describe the relief being sought by the protestant.

Attachment "A"

All the water rights listed in this transfer have a source Beaver Creek. This application is merely a request to change the nature of use from irrigation to recharge/mitigation. By doing so, the process of percolation will recharge the Snake River Plain Aquifer. This will be a benefit to both surface and groundwater users.

The proposed plan is to run all the water over a weir board, located at the stated point of diversion. This will give an accurate measurement of the volume of water being recharged back into the aquifer.

This application has two more advantages. First, there is no consumptive use, there are no crops to use any of the water. Secondly, this all takes place above the Mud Lake Barrier, by doing so this water is available to every water user on the Snake Plain Aquifer.
