STATE OF IDAHO

Water License No. 2096.

WHEREAS, On the 4th day of June, A.D. 1906, JOHN A. JACOBY, of Dubois, County of Fremont, State of Idaho, duly made application (No. 2869) to me for a permit to use 3.2 cubic feet per second of the waters of Camas Creek, County of Fremont, State of Idaho, for irrigation and domestic purposes, and,

WHEREAS, On the 30th day of June, A.D. 1906, Permit No. 2096 was issued to said applicant for the diversion of said water, and providing for the completion of the works of diversion therein described on or before the 30th day of June, A.D. 1907, and for the application to beneficial use of said water on or before the 30th day of June, A.D. 1911, and,

WHEREAS, On the 25th day of June, A.D. 1906, JOHN A. JACOBY transferred all his right, title and interest in and to said Permit No. 2096 to JOHN W. HAYS, Jr., and,

WHEREAS, On the 29th day of June, A.D. 1907, JOHN W. HAYS, Jr., the holder of said permit duly made proof of the completion of adequate works for the diversion of 3.2 cubic feet per second of said waters, as evidenced by my Certificate No. 2096, dated October 10th, 1907, confirming the completion of works of sufficient capacity for diverting and conveying to the place of intended use 3.2 cubic feet per second of water, with date of priority of June 4th, 1906, and,

WHEREAS, On the 22nd day of May, A.D. 1908, JOHN W. HAYS, Jr., transferred all his right, title and interest in and to said Permit No. 2096 to E. LAIRD and SONS, and,

WHEREAS, On the 30th day of May, A.D. 1911, E. LAIRD and Sons, the holders of said permit duly made proof of the application to beneficial use of 1.4 cubic feet per second of said water:

NOW, THEREFORE, By virtue of authority vested in me by the laws of the State of Idaho, I hereby grant and confirm to E. LAIRD and SONS, of Dubois, County of Fremont, State of Idaho, the holders and owners of said Permit No. 2096, a perpetual right, dating from June 4th, 1906, to the use of 1.4 cubic feet per second of the waters of Camas Creek, in the County of Fremont and State of Idaho, so much thereof as may be necessary for the purposes hereinafter mentioned, to be diverted at a point in the Southeast quarter of the Northwest quarter (SE $\frac{1}{4}$ NW $\frac{1}{4}$), Section 17, Township 9 North, Range 37 East of the Boise Meridian, and conducted to and upon 70 acres divided as follows: (35 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 18, and 35 acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 19, Twp. 9 N., R. 37, E., B.M., for the purpose of irrigation and domestic use, subject, however, to the laws of the State of Idaho applicable to a license for the use of the waters of the State, and subject, also, to the local or community customs, rules and regulations which have been or may be adopted from time to time by a majority of the users from a common source of supply, canal or lateral from which such water may be taken, when such rules and regulations have for their object the economical use of such water.

WITNESS, My hand and the seal of my office at Boise, Idaho, this 10th day of October, A.D. Nineteen hundred and eleven.

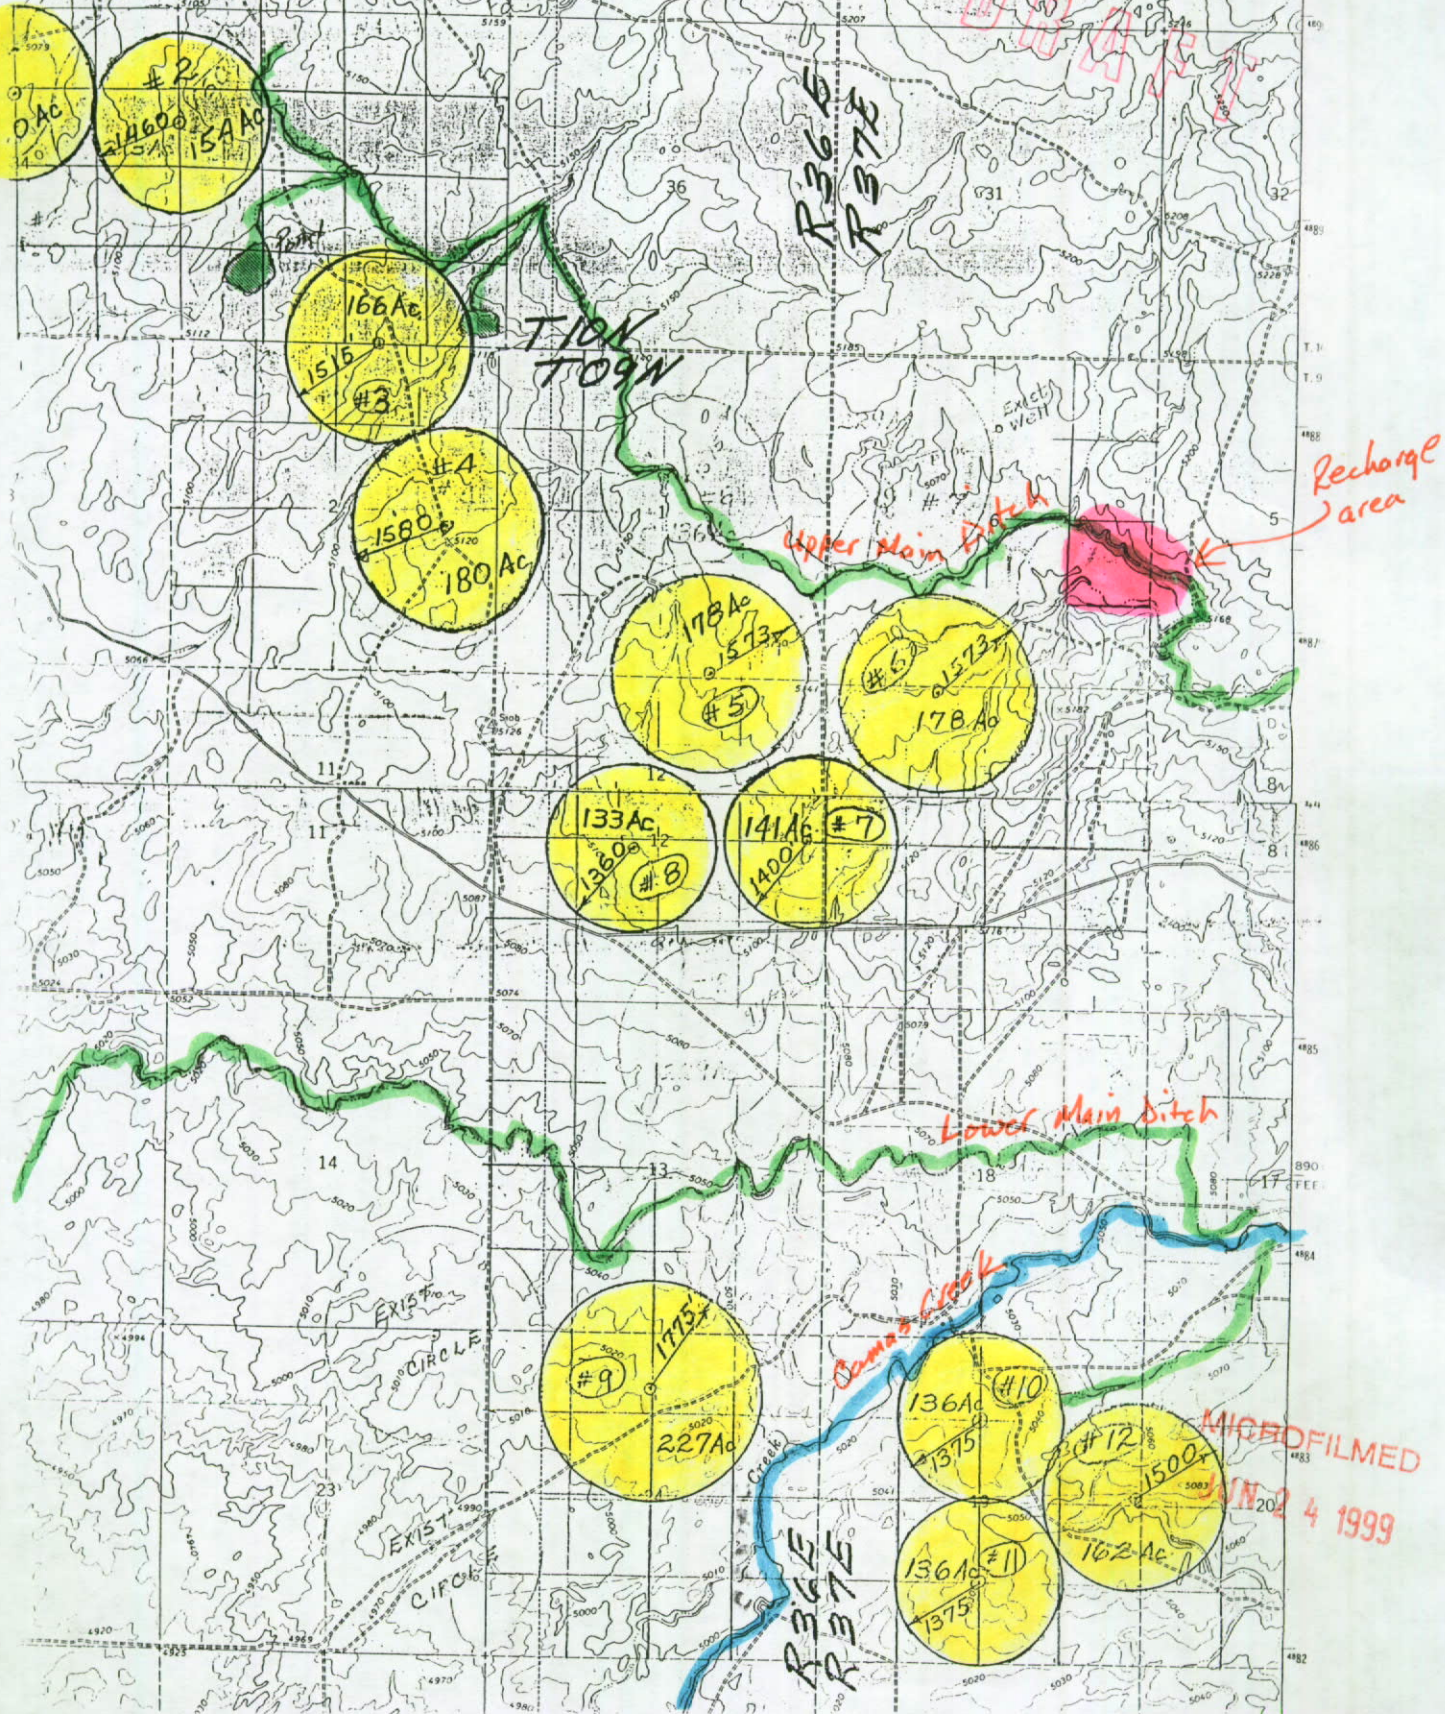

A. E. Robinson,
State Engineer.

PART 3 - MAP of NEW POINTS
OF DIVERSION & NEW
PLACES OF USE
(LAIRD & SONS APPLICATION)

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

RECEIVED
JUN 10 1999

Department of Water Resources

IN THE MATTER OF APPLICATION)
FOR TRANSFER NO. 5188 AND)
APPLICATION FOR PERMIT) **PRELIMINARY ORDER VOIDING**
NO. 31-07652 IN THE NAME OF) **THE APPLICATIONS**
LAIRD AND SONS INC.)

This matter having come before the Department of Water Resources (Department) as a result of an application to appropriate water, the Department makes the following Findings of Fact, Conclusion of Law, and Order:

FINDING OF FACT

1. On December 22, 1997, Transfer application No. 5188 and application for permit No. 31-07652 were submitted. The applications were protested by several parties.
2. On March 1, 1999, the Department mailed notice to the applicant requesting additional information concerning the proposed water development. The applicant has not responded and has not submitted the requested information.

CONCLUSION OF LAW

1. Section 42-204, *Idaho Code*, provided that the failure of an applicant to supply requested information within 30 days is cause for the Department to void an application.
2. The Department should void the applications as provided in Section 42-204, *Idaho Code*.

ORDER

IT IS, THEREFORE, HEREBY ORDERED that Application for Permit No. 31-07652 and Transfer Application No. 5188 in the name of Laird and Son, Inc. are **VOIDED** as provided in Section 42-204, *Idaho Code*.

Dated this 14th day of May, 1999.

RONALD D. CARLSON
Eastern Regional Manager

RE: In the Matter of Application for

Dear Interested Party:

**EXPLANATORY INFORMATION TO ACCOMPANY
A RECOMMEND ORDER**

The accompanying order is a "Recommended Order" issued by the department pursuant to section 67-5243, Idaho Code. The provisions of this order will not become effective until the Director issues a final order in this matter.

Each party to these proceedings who appeared at the hearing may file a petition for reconsideration, briefs and exceptions to the recommended order and may request oral argument before the Director of the department as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a recommended order with the hearing officer within fourteen (14) days of the service date of this order. The hearing officer will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243 (3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of this recommended order, (b) the service date of a denial of a petition for reconsideration from this recommended order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this recommended order, any party may in writing support or take exceptions to any part of a recommended order and may file briefs in support of the party's position on any issue in the proceeding. Written briefs in support of or taking exceptions to the recommended order shall be filed with the Director. Opposing parties shall have twenty-one (21) days to respond.

ORAL AGREEMENT

The Director may schedule oral argument in the matter before issuing a final order.

MICROFILMED
JUN 24 1999

Oral argument on exceptions to a recommended order shall be heard at the discretion of the Director. If oral arguments are to be heard, the Director will, within a reasonable time, notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

Any petition for reconsideration or other motion to the hearing officer shall be served upon all other parties to the proceeding. All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the recommended order shall be served on all other parties to these proceedings in accordance with Rule of Procedure 302 and 303.

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The agency may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

APPEAL OF FINAL ORDER TO DISTRICT COURT

A party aggrieved by a final order of the Director is entitled to judicial review in compliance with sections 67-5271 through 67-5279, Idaho Code.

MICROFILMED
JUN 24 1999

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 1

Name of applicant Laird & Sons, Inc. Phone 208-359-3024
Post Office address P.O. Box 145, Dubois, ID 83423

A. PURPOSE OF TRANSFER

1. ☐ Change point of diversion ☒ Add diversion point(s) ☒ Change place of use
☒ Change nature of use ☒ Change period of use ☐ Other _____
2. Describe the reason for the proposed changes _____ The applicant proposes to change an
existing surface water irrigation right to allow the water to be diverted
to underground storage and subsequently withdrawn for sprinkler irrigation.
See Attachment A for details.

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number Priority Amount
(cfs/ac-ft) Nature
of Use Period of Use
- See Attachment B
- | Right Number | Priority | Amount
(cfs/ac-ft) | Nature
of Use | Period of Use |
|--------------|----------|-----------------------|------------------|----------------|
| _____ | _____ | _____ | _____ | _____ to _____ |
| _____ | _____ | _____ | _____ | _____ to _____ |
| _____ | _____ | _____ | _____ | _____ to _____ |
| _____ | _____ | _____ | _____ | _____ to _____ |
2. Total amount of water being transferred 35.36 cubic feet per second and/or _____ acre-feet per annum.
3. Source of water Camas Creek tributary to Mud Lake
4. Point(s) of Diversion: See Attachment C

[illegible]

5. Lands irrigated or place of use: See Attachment D

[illegible]

Total acres 1,921

PART 1

6. General Information:

- a. Description of diversion system See attachment E

- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
Flood irrigated lands will convert to dry land grazing or center pivot
sprinkler irrigated fields

- d. Remarks:
See Attachment A

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____
And said application is hereby _____, subject to the following limitations and conditions:

Witness my hand this _____ day of _____, 19____.

Attachment A - Explanation of Proposed Transfer, Application for Permit, and Mitigation

The applicant (Laird & Sons, Inc.) proposes to change the nature of use of existing Camas Creek surface water irrigation rights to allow the water to be recharged into underground storage. The water will be subsequently withdrawn from wells for center-pivot sprinkler irrigation under a companion Application for Permit. The recharged surface water will serve as mitigation for the new permit

The transfer and companion permit applications are structured to result in no negative impacts on other water users. To accomplish no negative impact, the applicant will provide the equivalent aquifer recharge benefits of past flood irrigation practices, plus store an additional recharge volume equal to the irrigation volume proposed to be pumped out from well authorized by the companion Application. The proposed locations of recharge are in the near vicinity of proposed wells and of past flood irrigation.

The plan assumes (1) a 2.5 acre foot per acre sprinkler irrigation diversion requirement, (2) a maximum 2.0 acre foot per acre consumptive irrigation requirement, and (3) an 80 percent irrigation efficiency. The applicant proposes recharging 3.5 acre feet of surface water for every acre that will be irrigated from groundwater. The net effect will be a minimum of one acre foot of excess groundwater recharge per acre irrigated.

Historic use of the Camas Creek water rights suggest an average fully irrigated area equivalent to 1,921 acres. This is based on a 20-year Camas Creek diversion average of 6,723.5 acre feet (from watermaster records) and a local flood irrigation delivery requirement of 3.5 acre feet per acre. Therefore, if 1,921 acres are irrigated each year following the transfer, the project must recharge a minimum average volume of 6,723.5 acre feet, of which a maximum of 4,802.5 acre feet will be pumped back from groundwater storage for irrigation, and a minimum of 1,921 acre feet will remain in the aquifer as an annual net recharge benefit. Additional recharge benefit might be achieved from irrigation losses, although the amount will be minimal from the efficient center pivot sprinkler systems that are proposed.

Recharge will be accomplished through use of dedicated recharge facilities (infiltration ditches, ponds, or injection wells) and existing ditches. Use of the existing ditches will allow the applicant to maintain stockwater use. The applicant shall take necessary measures to prevent the water from running over the top of the ditches, where it would be consumptively used by pasture grasses.

The applicant recognizes that wildlife and fisheries will benefit from returning flow to Camas Creek, downstream from the applicant's headgate. Therefore, when flows in Camas Creek decline to the point that flow does reach the next water right holder downstream from the applicant's headgate, the applicant may divert water back into the stream bed of Camas Creek for recharge purposes. At times when Camas Creek stream flows are large enough to reach the diversion point for the next downstream water right,

REPROFILMED
JUN 24 1999

no recharge credit shall be given for water diverted back to the creek for recharge purposes.

Accounting of recharge and discharge will utilize a 5-year running average. Irrigated acreage will not exceed 1,921 acres in any year. If the 5-year average recharge volume falls below 6723.5 acre feet, the applicant shall reduce the irrigated acreage by one acre per 3.5 acre feet of average recharge deficit. During the first two years of recharge, the discharge each year shall not exceed 70 percent of the year's recharge. For years three, four, and five, the maximum irrigated area will be based on the 3-year, 4-year, and 5-year running averages, respectively.

The water master will measure diversions from Camas Creek for recharge purposes. All wells and pumps will be equipped with totalizing flow meters. The applicant will report irrigation volumes, recharge diversions, and crop acreage to the Department on an annual basis.

The proposed transfer does not disrupt the existing surface water delivery structure on Camas Creek, so that downstream or upstream surface water users will not be benefited or injured by the transfer. The mitigation associated with the Application for Permit provides for reduction in irrigation diversions from groundwater in the event of extended drought, which will provide protection to other groundwater users. In addition, the applicant proposes to recharge approximately 40 percent more water than will be subsequently pumped for irrigation, which should be beneficial to other groundwater users. The applicant will lose the ability to irrigate large areas of the property with floodwaters, but will gain a dependable water supply to irrigate a smaller land area growing higher value crops. The applicant will benefit in crop planning because water supply reductions during drought periods can be anticipated a year or more in advance due to the running 5-year average. As a result, the land can be farmed efficiently without the fear of losing the irrigation source late in the irrigation season.

All of the water rights listed above are legitimate, decreed rights.

Analysis: 134486a.f. per year/20 years = 6724a.f. per year.
An average of 6724a.f. per year could be diverted off of this set of water rights.

The above figures do not include periods of non-use which occurred when the U.S. Fish and Wildlife Service called in their demand for priority waters.

The above figures do not include March, April, and December water uses for livestock watering, early Spring, or late Fall irrigation.

All the water rights listed above, have a record of use from May 1 to November 1.

The data above was taken from the Water Master's Water Reports.
This data was compiled by Don and Greg Shenton, Water Masters.

Signed: Donald W. Shenton 4/13/94
Water Master

Attachment E

Description of the Diversion System for Transfer and Companion Application for Permit

The diversion system will consist of the following components.

Camas Creek diversion dams, ditches, recharge facilities for groundwater recharge of surface water rights described by the transfer.

Wells, pumps, and center pivot sprinklers for irrigation use described by the Application for Permit.

Each of these components are described below. Locations are shown on the map included in Part 3 of this application.

Camas Creek Diversion Dams. The two diversion dams currently utilized by these water rights will continue to be used for diversion of water from Camas Creek. The upper dam is located in the NWNENE Section 9, T9N, R37E, and diverts water to a ditch on the west side of the creek. The lower dam is located in the NWSWNE Section 17, T9N, R37E, and diverts water into ditches on both sides of the creek. The two diversion dams will be the point of measurement for determination of recharge volumes.

Ditches. Three main ditches are currently present on the property.

- The upper main ditch extends from the upper dam in a west and northwest direction into Section 35, T10N, R36E. This is the largest of the three ditches.
- The lower main ditch extends from the lower dam in a westward direction into Section 15, T9N, R36E.
- The lower south ditch extends from the lower dam in a south and southwesterly direction into Section 19, T9N, R37E. This is the smallest of the three ditches.

All three of the ditches will be used for recharge and stockwater uses. It is anticipated that the upper main ditch will supply most of the recharge facilities; the lower ditches will also supply recharge facilities, but perhaps to a lesser extent. The lower diversion will be equipped with a headgate that will allow water to be diverted back to Camas Creek for recharge, under the conditions described in Attachment A. New ditches will also be constructed for recharge purposes as described below.

Recharge Facilities. Recharge facilities have not been constructed, except for existing ditches and some leaky ponds at the end of the upper main ditch. It is anticipated that the primary recharge area will be lava beds in Section 6, T9N, R37E. The water will be diverted into leaky recharge ditches or ponds to be constructed in this area.

Other recharge facilities will be constructed, as needed, in the vicinities of the existing ditches. Initially, it is anticipated that all recharge will be accomplished through infiltration type facilities rather than wells. If adequate infiltration facilities cannot be

MICROFILMED
JUN 24 1999

constructed, recharge wells will be considered. Recharge wells are not preferred due to water quality and permitting issues.

Wells and Pumps. A well and pump will be constructed at each center pivot sprinkler site. It is anticipated that each well will be approximately 200 to 500 feet deep and will be constructed with 12-inch or 16-inch diameter casing. Each well pump will be equipped with a non-resettable totalizing flow meter. The discharge rate of all of the pumps in total will not exceed the 35.36 cfs diversion rate authorized by the existing water rights.

Center Pivot Sprinklers. Center pivot sprinklers will be utilized for irrigation. The radii of the pivot circles will range 1360 to 1775 feet. Circle areas will range from 133 to 227 acres. Radius and irrigated area for each pivot is listed below

Pivot #1 - radius is 1340 feet, irrigated area is 130 acres

Pivot #2 - radius is 1460 feet, irrigated area is 154 acres

Pivot #3 - radius is 1515 feet, irrigated area is 166 acres

Pivot #4 - radius is 1580 feet, irrigated area is 180 acres

Pivot #5 - radius is 1573 feet, irrigated area is 178 acres

Pivot #6 - radius is 1573 feet, irrigated area is 178 acres

Pivot #7 - radius is 1400 feet, irrigated area is 141 acres

Pivot #8 - radius is 1360 feet, irrigated area is 133 acres

Pivot #9 - radius is 1775 feet, irrigated area is 227 acres

Pivot #10 - radius is 1375 feet, irrigated area is 136 acres

Pivot #11 - radius is 1375 feet, irrigated area is 136 acres

Pivot #12 - radius is 1500 feet, irrigated area is 162 acres

MICROFILMED

Attachment F - Determination of Past Beneficial Use and Irrigated Area

The place of use for the rights involved in this transfer are described by decree (Ernest Sauve vs W.H. Abbott, 11/1/1930). Taking overlap into account and assuming full irrigation of each quarter-quarter section described, the decreed place of use for eight of the nine rights describe an irrigated area of up to 1315 acres. The ninth right (31-00323) does not list a place of use; the irrigated area is assumed to be approximately 500 acres, based on a 0.02 cfs per acre diversion rate. Therefore, the irrigated area described by the decree totals a maximum area of about 1815 acres.

The SRBA claims reflect the current place of use under these water rights during years when abundant water supplies are available. The SRBA claims describe an irrigated area of up to 3,287 acres. This figure should be considered a maximum, because Camas Creek water is generally not available for irrigation of the full 3,287 acres.

ASCS records indicate an average irrigated area of more than 2,500 acres in the years 1991-93. Laird's own investigation of the irrigated area indicates that the Camas Creek irrigated area in most years includes approximately 2,297.2 acres in ASCS numbered fields and an additional 428 acres of irrigated pasture, for a total irrigated area of about 2,725 acres. Many of these acres are not irrigated late in the season after Camas Creek flows have declined. Some of these acres have received supplemental irrigation from groundwater under water right 31-7220.

Water master records for Camas Creek suggest an average 20-year diversion volume of 6,724 under the Laird rights. Assuming a diversion requirement of 3.5 acre feet per acre, the average annual diversion volume has been equivalent to full irrigation of 1921 acres. The place of use has been within the 3,287 acres claimed in the SRBA for the Camas Creek water rights.

RE: Transfer Application #5188

Mr. Laird:

On June 21, 1994, you sent application for transfer #4488 to this office. It proposed to sink various surface water rights on Camas Creek and convert those same rights to well rights. Subsequently the application was protested and an amended application was submitted on July 30, 1996.

No agreement was reached with the protestants and transfer application #4488 was withdrawn on Dec 22, 1997. Transfer application #5188 was submitted as a replacement the same day. The application intended to just recharge all of the listed Camas Creek rights. A separate application for permit #31-07652 was submitted for groundwater (well) rights to take the place of the surface rights committed to recharge. Both the new transfer application #5188 and application #31-07652 were protested by various parties.

It has now been a year since any action has taken place on these applications by you the applicant. Notice is now given that only 2 options are available to you concerning these protested applications.

First if you plan to request a hearing then a detailed and specific plan on how Camas Creek water would be recharged must be submitted. Since much of Camas Creeks flow in this reach sinks ordinarily I think this will be a difficult task to address.

This plan must show how the groundwater aquifer that will supply the water for the wells will be directly recharged.

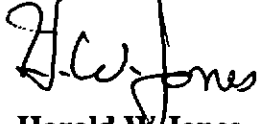

MICROFILMED

JUN 24 1999

Page 2
Laird & Sons

Your other option is to withdraw the applications. You have 60 days to respond to this request or a show cause order will be sent as to why these applications should not be rejected.

Sincerely,

A handwritten signature in dark ink, appearing to read "H. W. Jones". The signature is written in a cursive style with a large initial "H" and a long, sweeping underline.

RE: Application for Permit No. 31-07652 AND Transfer No. 5188
Laird and Sons, Inc.

Dear applicant:

Enclosed are copies of protests filed against the issuance of the above referenced applications. The Department suggests you contact the protestants directly in an effort to determine the nature of the protests and to attempt to resolve the protests.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protests. At a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit and the application for transfer (Idaho Code § 42-203):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?
6. Is the proposed use contrary to conservation of water resources within the State of Idaho?

The applicant must be prepared to present evidence and/or testimony addressing each of the six items. Although representation by legal counsel is not mandatory at a proceeding before the Department, you may retain an attorney in your behalf.

If this office can be of further assistance, please contact us.

Sincerely,

Harold W. Jones

* * * * *

Idaho Power Company, by and through its attorneys, Rosholt, Robertson & Tucker, files its Notice of Protest to the approval of the Proposed Change of a Water Right Numbers 31-00238, 31-00239, 31-00125, 31-00127, 31-00124, 31-00126, 31-00167, 31-00128 and 31-00323, pursuant to Transfer No. 5188 filed in the name of Laird and Sons, Inc. The basis for Idaho Power's protest is as follows:

1. The application filed by the applicant seeks to change the points of diversion for the above-numbered rights from surface water diversions to groundwater diversions in the trust water area. According to the USGS, such change would negatively impact surface water flows in the non-trust water, which surface water flows are tributary to the flow of the Snake River above Milner Dam;

MICROFILMED

JUN 24 1999

2. The proposed changes in points of diversion described in the aforesaid application would violate all or a portion of the criteria set forth in Idaho Code Section 42-203(A)(5), and specifically, would cause injury to the rights of Idaho Power.

DATED this 2nd day of January, 1998.

Re: Protest

Dear Ron:

We are water right holders on Camas Creek and are very concerned about the application for transfer 5188 and application for permit 31-07652. As we understand the intent of these two applications, Joe Laird proposes to spread surface water rights totaling 35.36 cfs over a portion of the designated place of use in an attempt to get credit for recharging water this amount of water. In return he has applied to appropriate 35.36 cfs from groundwater to be used on the lands listed under the surface water rights.

The problem is, the surface water rights have never provided adequate water to irrigate the Laird property. If the application is approved it will clearly result in an expansion of use, that is, a greater number of acres having a full water supply. Our concern, is that in an attempt to make this work there will be new demands on Camas Creek in an attempt to meet obligations under the combined transfer and application.

Very truly yours,

Jack R. Hamilton

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR CHANGE)
OF WATER RIGHT, APPLICATION NO. 5188) NOTICE OF
AND APPLICATION FOR WATER RIGHT,) PROTEST
NO. 31-07652, BY LAIRD & SONS, INC.)

Comes now the U.S. Fish and Wildlife Service (Fish and Wildlife Service) and protests, pursuant to Idaho Code § 42-222, the application of Laird and Sons, Inc., for Change of Water Right No. 5188 (water rights nos. 31-00238, 31-00239, 31-00124, 31-00125, 31-00126, 31-00127, 31-00128, 31-00167, and 31-00323, filed by Laird & Sons, Inc. Applicant seeks to add points of diversion, and change place of use and nature of use of the waters of Camas Creek, tributary to Mud Lake, so as to change the nature of use to groundwater recharge and stockwater.

This protest is filed upon the grounds and for the reason that the proposed change may injure water rights of the Fish and Wildlife Service, constitute an enlargement in use of the original right, and/or conflict with the local public interest. The Fish and Wildlife Service has not had sufficient time to fully research the proposed transfer and potential impacts.

The Fish and Wildlife Service also protests, pursuant to Idaho Code §42-203A, application for water right no. 31-07652 filed by Laird & Sons, Inc. Applicant seeks a permit for twelve new irrigation wells using the water tied to the above recharge application. This protest is filed upon the grounds and for the reason that the proposed change may reduce the quantity of water under existing water rights, the water supply may be insufficient, and/or the proposed change may conflict with the local public interest. The Fish and Wildlife Service has not had sufficient time to fully research the proposed transfer and potential impacts.

The Fish and Wildlife Service submits herein the filing fee of \$50 (\$25 per protest).

Re: Application for Transfer of Water Rights by Laird & Sons, Inc.
Proposed Transfer No. 5188

Gentlemen:

We have been requested by our clients, Owsley Canal Company, Jackett Canal Company, Holley Water Users, Inc., Jefferson Irrigation Company, Producers Canal Company, Montevue Canal Company and Independent Water Users of Mud Lake, Inc., to protest the above referenced application filed by Laird & Sons, Inc., for the transfer of water rights numbers 31-00238, 31-00239, 31-00124, 31-00125, 31-00126, 31-00127, 31-00128, 31-00167, and 31-00323.

This protest is filed on the grounds and for the reason that the proposed change will injure water rights of the protestants, that the proposed change may constitute an enlargement in use of the original right, that the proposed change may be inconsistent with the conservation of water resources within the State of Idaho, and that the proposed change is not in the local public interest. We have enclosed our check in the amount of \$25.00 for the filing fee and a copy of this letter has been sent directly to the applicant at the address shown in the notice published in the Post Register.

Yours very truly,

Kent W. Foster

RE: Application for Permit No. 31-07652 and Transfer No. 5188
LAIRD & SONS

Dear Protestant:

Your protest against approval of the above referenced application has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protest. At such a conference and/or hearing, the following are the principle items the Department can consider in their approving or denying the application (Idaho Code § 42-203) he following are the principle items the Department can consider in either approving or denying the applications for (Idaho Code § 42-203):

1. Will the proposed use reduce the quantity of water under existing rights?

2. Is the proposed water supply insufficient for the purpose intended?

3. Is the application made in good faith or for delay or speculative purposes?

4. Has the applicant sufficient financial resources with which to complete the project?

5. Will the proposed use under this permit conflict with the local public interest?

6. Is the proposed use contrary to conservation of water resources within the State of Idaho?

MICROFILMED

JUN 24 1999

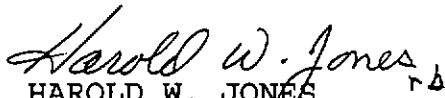

Page 2

The protestant must be prepared to present proof of allegations involving one or more of the six items.

In addition, Rule 302 of the Department's Rules of Procedure requires a protestant to send a copy of the protest to the applicant in question.

If this office can be of further assistance, please contact us.

Sincerely,

HAROLD W. JONES^{rb}
Water Rights Supervisor

RE: Application for Permit No. 31-07652 and Transfer No. 5188
LAIRD & SONS

Dear Protestant:

Your protest against approval of the above referenced application has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protest. At such a conference and/or hearing, the following are the principle items the Department can consider in their approving or denying the application (Idaho Code § 42-203) the following are the principle items the Department can consider in either approving or denying the applications for (Idaho Code § 42-203):

1. Will the proposed use reduce the quantity of water under existing rights?

2. Is the proposed water supply insufficient for the purpose intended?

3. Is the application made in good faith or for delay or speculative purposes?

4. Has the applicant sufficient financial resources with which to complete the project?

5. Will the proposed use under this permit conflict with the local public interest?

6. Is the proposed use contrary to conservation of water resources within the State of Idaho?

MICROFILMED

JUN 24 1999

Page 2

The protestant must be prepared to present proof of allegations involving one or more of the six items.

In addition, Rule 302 of the Department's Rules of Procedure requires a protestant to send a copy of the protest to the applicant in question.

If this office can be of further assistance, please contact us.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

RE: Application for Permit No. 31-07652 AND Transfer No. 5188
Laird and Sons, Inc.

Dear applicant:

Enclosed are copies of protests filed against the issuance of the above referenced applications. The Department suggests you contact the protestants directly in an effort to determine the nature of the protests and to attempt to resolve the protests.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protests. At a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit and the application for transfer (Idaho Code § 42-203):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?
6. Is the proposed use contrary to conservation of water resources within the State of Idaho?

The applicant must be prepared to present evidence and/or testimony addressing each of the six items. Although representation by legal counsel is not mandatory at a proceeding before the Department, you may retain an attorney in your behalf.

If this office can be of further assistance, please contact us.

Sincerely,

**NOTICE OF
PROPOSED CHANGE
OF A WATER RIGHT
NO. 5188**

Notice is hereby given that LAIRD & SONS, INC. P.O. Box 145, Dubois, ID 83423, has applied to the Department of Water Resources to add points of diversion, change place of use, and nature of use of the waters of Camas Creek tributary to Mud Lake. The rights sought to be changed are evidenced and recorded as follows:

No.'s: 31-00238, 31-00239, 31-00124, 31-00125, 31-00126, 31-00127, 31-00128, 31-00167, 31-00323

Source: Camas Creek Nature of Use: Irrigation Amount: 35.16CFS Stockwater 0.23CFS

The water is used for irrigation of approximately 1,921 acres within Clark County.

**TO BE CHANGED
AS FOLLOWS:**

The applicant intends to change the nature of use for all the above rights to "Groundwater Recharge and Stockwater" through a series of ditches and other recharge facilities. This will take place in twelve different sections of T09N R36E, R37E and T10N R36E. A companion Application for Permit for twelve new irrigation wells using a like amount of water is tied to this recharge application. Please see the accompanying legal notice "Notice of Application for Water Right No. 31-07652". The applicant intends to use the recharged water as mitigation for

the use of 35.16 cfs of well water to irrigate 1,921 acres and 0.23 cfs to water stock in the same Township and Range as listed above.

Any protests against approval of the proposed change must be filed with the Idaho Department of Water Resources, 900 N. Skyline Dr., Idaho Falls, ID, 83402, together with a protest fee of \$25 on or before February 2, 1998. The protestant must also send a copy of the protest to the applicant.

OF TWIN FALLS } SS.

No 30149

I, Emily McKnight being first duly sworn upon oath, depose and say that I am principle clerk of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for two consecutive weeks, commencing with the issue dated January 15, 19 98, and ending with the issue dated January 22, 19 98.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 22nd day of Jan in the year of 1998, before me,

a Notary Public, personally appeared Emily McKnight known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

NOTICE OF PROPOSED CHANGE: OF A WATER RIGHT NO. 5188

164427

Notice is hereby given that LAIRD & SONS, INC. P.O. Box 145, Dubois, ID 83423, has applied to the Department of Water Resources to add points of diversion, change place of use, and nature of use of the waters of Camas Creek tributary to Mud Lake. The rights sought to be changed are evidenced and recorded as follows:

No.'s: 31-00238, 31-00239, 31-00124, 31-00125, 31-00126, 31-00127, 31-00128, 31-00167, 31-00323

Source: Camas Creek Nature of Use: Irrigation Amount: 35.16CFS
Stockwater 0.23CFS

The water is used for irrigation of approximately 1,921 acres within Clark County.

TO BE CHANGED AS FOLLOWS:

The applicant intends to change the nature of use for all the above rights to "Groundwater Recharge and Stockwater" through a series of ditches and other recharge facilities. This will take place in twelve different sections of T09N R36E, R37E and T10N R36E. A Companion Application for Permit for twelve new irrigation wells using a like amount of water is tied to this recharge application. Please see the accompanying legal notice "Notice of Application for Water Right No. 31-07652". The applicant intends to use the recharged water as mitigation for the use of 35.16 cfs of well water to irrigate 1,921 acres and 0.23 cfs to water stock in the same Township and Range as listed above.

Any protests against approval of the proposed change must be filed with the Idaho Department of Water Resources, 900 N. Skyline Dr., Idaho Falls, ID, 83402, together with a protest fee of \$25 on or before February 2, 1998. The protestant must also send a copy of the protest to the applicant.

RE: Laird & Sons, Inc. Revised Application for Transfer of Water Rights

Dear Mr. Dreher,

We sent the original version of this Application for Transfer of Water Rights to your office on June 21, 1994. It was subsequently amended and this amended version was sent to your office on July 30, 1996. Although we have tried to reach some type of agreement with the groups opposing this transfer, we have not been able to get their support. We ask that Transfer Application No. 4488 be withdrawn.

Under the enclosed new Application For Transfer of Water Right we are proposing that the existing surface water irrigation right be amended to allow the water to be diverted to underground storage and then be subsequently withdrawn for sprinkler irrigation. Also enclosed herewith is the Application For Permit requesting withdrawal of the diverted and stored water via wells at 12 locations located within the general area where the surface water will be diverted to underground storage.

We ask that you please proceed with the necessary advertisements, hearings, etc. on the amended Application for Transfer of Water Rights and the Application For Permit as submitted herewith.

Thank you very much.

Very truly yours,

JOSEPH A. LAIRD, P.E.
President, Laird & Sons, Inc.

NOTICE OF PROPOSED CHANGE OF A WATER RIGHT
NO. 5188

Notice is hereby given that LAIRD & SONS, INC. P.O. Box 145, Dubois, ID 83423, has applied to the Department of Water Resources to add points of diversion, change place of use, and nature of use of the waters of Camas Creek tributary to Mud Lake. The rights sought to be changed are evidenced and recorded as follows:

No.'s: 31-00238, 31-00239, 31-00124, 31-00125, 31-00126,
31-00127, 31-00128, 31-00167, 31-00323

<u>Source:</u> Camas Creek	<u>Nature of Use:</u> Irrigation	<u>Amount:</u> 35.16CFS
	Stockwater	0.23CFS

The water is used for irrigation of approximately 1,921 acres within Clark County;

TO BE CHANGED AS FOLLOWS:

The applicant intends to change the nature of use for all the above rights to "Groundwater Recharge and Stockwater" through a series of ditches and other recharge facilities. This will take place in twelve different sections of T09N R36E, R37E and T10N R36E. A companion Application for Permit for twelve new irrigation wells using a like amount of water is tied to this recharge application. Please see the accompanying legal notice "Notice of Application for Water Right No. 31-07652". The applicant intends to use the recharged water as mitigation for the use of 35.16 cfs of well water to irrigate 1,921 acres and 0.23 cfs to water stock in the same Township and Range as listed above.

Any protests against approval of the proposed change must be filed with the Idaho Department of Water Resources, 900 N. Skyline Dr., Idaho Falls, ID, 83402, together with a protest fee of \$25 on or before February 2, 1998. The protestant must also send a copy of the protest to the applicant.

NOTICE OF PROPOSED CHANGE OF A WATER RIGHT
NO. 5188

Notice is hereby given that LAIRD & SONS, INC. P.O. Box 145, Dubois, ID 83423, has applied to the Department of Water Resources to add points of diversion, change place of use, and nature of use of the waters of Camas Creek tributary to Mud Lake. The rights sought to be changed are evidenced and recorded as follows:

No.'s: 31-00238, 31-00239, 31-00124, 31-00125, 31-00126, 31-00127, 31-00128, 31-00167, 31-00323

<u>Source:</u> Camas Creek	<u>Nature of Use:</u> Irrigation	<u>Amount:</u> 35.16CFS
	Stockwater	0.23CFS

The water is used for irrigation of approximately 1,921 acres within Clark County.

TO BE CHANGED AS FOLLOWS:

The applicant intends to change the nature of use for all the above rights to "Groundwater Recharge and Stockwater" through a series of ditches and other recharge facilities. This will take place in twelve different sections of T09N R36E, R37E and T10N R36E. A companion Application for Permit for twelve new irrigation wells using a like amount of water is tied to this recharge application. Please see the accompanying legal notice "Notice of Application for Water Right No. 31-07652". The applicant intends to use the recharged water as mitigation for the use of 35.16 cfs of well water to irrigate 1,921 acres and 0.23 cfs to water stock in the same Township and Range as listed above.

Any protests against approval of the proposed change must be filed with the Idaho Department of Water Resources, 900 N. Skyline Dr., Idaho Falls, ID, 83402, together with a protest fee of \$25 on or before February 2, 1998. The protestant must also send a copy of the protest to the applicant.

RE: Notice of Application for Transfer No. 5188

Dear Applicant:

This office is currently in the process of advertising the application in the Post Register and statewide on Jan. 15 & 22, 1998. The advertisement will be published once a week for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Harold W. Jones

RE: Laird & Sons, Inc. Revised Application for Transfer of Water Rights

Dear Mr. Dreher,

We sent the original version of this Application for Transfer of Water Rights to your office on June 21, 1994. It was subsequently amended and this amended version was sent to your office on July 30, 1996. Although we have tried to reach some type of agreement with the groups opposing this transfer, we have not been able to get their support. We ask that Transfer Application No. 4488 be withdrawn.

Under the enclosed new Application For Transfer of Water Right we are proposing that the existing surface water irrigation right be amended to allow the water to be diverted to underground storage and then be subsequently withdrawn for sprinkler irrigation. Also enclosed herewith is the Application For Permit requesting withdrawal of the diverted and stored water via wells at 12 locations located within the general area where the surface water will be diverted to underground storage.

We ask that you please proceed with the necessary advertisements, hearings, etc. on the amended Application for Transfer of Water Rights and the Application For Permit as submitted herewith.

Thank you very much.

Very truly yours,

JOSEPH A. LAIRD, P.E.
President, Laird & Sons, Inc.

JUN 24 1999

Attachment A - Explanation of Proposed Transfer

The applicant proposes to change the nature of use, place of use, and season of use of an existing surface water irrigation right to allow the water to be diverted into underground storage and subsequently withdrawn from wells for center-pivot sprinkler irrigation.

The transfer is structured to result in no negative impacts on other water users as a result of the change in water right. To accomplish no negative impact, the applicant will provide the equivalent aquifer recharge benefits of past flood irrigation practices, plus store an additional recharge volume equal to the irrigation volume to be pumped out. The proposed locations of recharge are in the near vicinity of proposed wells and of past flood irrigation.

The applicant proposes recharging 3.5 acre feet of surface water for every acre irrigated from groundwater storage. The net effect will be a minimum of one acre foot of excess groundwater recharge per acre irrigated; a 2.5 acre foot per acre sprinkler irrigation diversion requirement, maximum 2.0 acre foot per acre consumptive irrigation requirement, and an 80 percent irrigation efficiency are assumed following the transfer.

Historic use of the water rights suggest an average fully irrigated area equivalent to 1,921 acres. This is based on a 20-year Camas Creek diversion average of 6,723.5 acre feet (from watermaster records) and a local flood irrigation delivery requirement of 3.5 acre feet per acre. Therefore, if 1,921 acres are irrigated each year following the transfer, the project must recharge a minimum average volume of 6,723.5 acre feet, of which a maximum of 4,802.5 acre feet will be pumped back from groundwater storage for irrigation, and a minimum of 1,921 acre feet will remain in the aquifer as an annual net recharge benefit. Additional recharge benefit might be achieved from irrigation losses, although the amount will be minimal from the efficient center pivot sprinkler systems that are proposed.

Accounting of recharge and discharge will utilize a 5-year running average. Irrigated acreage will not exceed 1,921 acres in any year. If the 5-year average recharge volume falls below 6723.5 acre feet, the applicant shall reduce the irrigated acreage by one acre per 3.5 acre feet of average recharge deficit.

Recharge will be accomplished through use of dedicated recharge facilities (infiltration ditches, ponds, or injection wells) and existing ditches. Use of the existing ditches will allow the applicant to maintain stockwater use. The applicant shall take necessary measures to prevent the water from running over the top of the ditches, where it would be consumptively used by pasture grasses. The water master will measure diversions from Camas Creek for recharge purposes. All well pumps will be equipped with totalizing flow meters. The applicant will report irrigation volumes, recharge diversions, and crop acreage to the Department on an annual basis.

MICROFILMED

JUN 24 1999

The proposed transfer does not disrupt the existing surface water delivery structure on Camas Creek, so that downstream or upstream surface water users will not be benefited or injured by the transfer. The groundwater storage component provides for reduction in irrigation diversions from groundwater in the event of extended drought, which should provide protection to other groundwater users. In addition, the applicant proposes to recharge approximately 40 percent more water than will be subsequently pumped for irrigation, which should be beneficial to other groundwater users. The applicant will lose the ability to irrigate large areas of the property with floodwaters, but will gain a dependable water supply to irrigate a smaller land area growing higher value crops. The applicant will benefit in crop planning because water supply reductions during drought periods can be anticipated a year or more in advance due to the running 5-year average. As a result, the land can be farmed efficiently without the fear of losing the irrigation source late in the irrigation season.

All of the water rights listed above are legitimate, decreed rights.

Analysis: 134486a.f. per year/20 years = 6724a.f. per year.
An average of 6724a.f. per year could be diverted off of this set of water rights.

The above figures do not include periods of non-use which occurred when the U.S. Fish and Wildlife Service called in their demand for priority waters.

The above figures do not include March, April, and December water uses for livestock watering, early Spring, or late Fall irrigation.

All the water rights listed above, have a record of use from May 1 to November 1.

The data above was taken from the Water Master's Water Reports.
This data was compiled by Don and Greg Shenton, Water Masters.

Signed: Donald W. Shenton 4/13/94
water master

Notes

- Storage for irrigation is the maximum volume that could be stored in a 5-year period, assuming that each right is fully diverted for the entire season.
- Irrigation from storage is limited to 2.5 acre feet per acre per year, up to a maximum of 4,803 acre feet (1,921 acres x 2.5 acre feet per acre) in any year.

Attachment E

Description of the Diversion System

The diversion system will consist of the following components: Camas Creek diversion dams, ditches, recharge facilities, wells and pumps, and center pivot sprinklers. Each of these components are described below. Locations are shown on the map included in Part 3 of this application.

Camas Creek Diversion Dams. The two diversion dams currently utilized by these water rights will continue to be used for diversion of water from Camas Creek. The upper dam is located in the NWNENE Section 9, T9N, R37E, and diverts water to a ditch on the west side of the creek. The lower dam is located in the NWSWNE Section 17, T9N, R37E, and diverts water into ditches on both sides of the creek. The two diversion dams will be the point of measurement for determination of recharge volumes.

Ditches. Three main ditches are currently present on the property.

- The upper main ditch extends from the upper dam in a west and northwest direction into Section 35, T10N, R36E. This is the largest of the three ditches.
- The lower main ditch extends from the lower dam in a westward direction into Section 15, T9N, R36E.
- The lower south ditch extends from the lower dam in a south and southwesterly direction into Section 19, T9N, R37E. This is the smallest of the three ditches.

All three of the ditches will be used for recharge and stockwater uses. It is anticipated that the upper main ditch will supply most of the recharge facilities; the lower ditches will also supply recharge facilities, but perhaps to a lesser extent. New ditches will also be constructed for recharge purposes as described below.

Recharge Facilities. Recharge facilities have not been constructed, except for existing ditches and some leaky ponds at the end of the upper main ditch. It is anticipated that the primary recharge area will be lava beds in Section 6, T9N, R37E. The water will be diverted into leaky recharge ditches or ponds to be constructed in this area. Other recharge facilities will be constructed, as needed, in the vicinities of the existing ditches. Initially, it is anticipated that all recharge will be accomplished through infiltration type facilities rather than wells. If adequate infiltration facilities cannot be constructed, recharge wells will be considered. Recharge wells are not preferred due to water quality and permitting issues.

Wells and Pumps. A well and pump will be constructed at each center pivot sprinkler site. It is anticipated that each well will be approximately 200 to 500 feet deep and will be constructed with 12-inch or 16-inch diameter casing. Each well pump will be equipped with a non-resettable totalizing flow meter. The discharge rate of all of the

MICROFILMED
JUN 24 1999

pumps in total will not exceed the 35.36 cfs diversion rate authorized by the existing water rights.

Center Pivot Sprinklers. Center pivot sprinklers will be utilized for irrigation. The radii of the pivot circles will range 1360 to 1775 feet. Circle areas will range from 133 to 227 acres. Radius and irrigated area for each pivot is listed below

Pivot #1 - radius is 1340 feet, irrigated area is 130 acres

Pivot #2 - radius is 1460 feet, irrigated area is 154 acres

Pivot #3 - radius is 1515 feet, irrigated area is 166 acres

Pivot #4 - radius is 1580 feet, irrigated area is 180 acres

Pivot #5 - radius is 1573 feet, irrigated area is 178 acres

Pivot #6 - radius is 1573 feet, irrigated area is 178 acres

Pivot #7 - radius is 1400 feet, irrigated area is 141 acres

Pivot #8 - radius is 1360 feet, irrigated area is 133 acres

Pivot #9 - radius is 1775 feet, irrigated area is 227 acres

Pivot #10 - radius is 1375 feet, irrigated area is 136 acres

Pivot #11 - radius is 1375 feet, irrigated area is 136 acres

Pivot #12 - radius is 1500 feet, irrigated area is 162 acres

Attachment F - Lands Irrigated or Place of Use

The place of use for the rights involved in this transfer are described by decree (Ernest Sauve vs W.H. Abbott, 11/1/1930). Taking overlap into account and assuming full irrigation of each quarter-quarter section described, the decreed place of use for eight of the nine rights describe an irrigated area of up to 1315 acres. The ninth right (31-00323) does not list a place of use; the irrigated area is assumed to be approximately 500 acres, based on a 0.02 cfs per acre diversion rate. Therefore, the irrigated area described by the decree totals a maximum area of about 1815 acres.

The SRBA claims reflect the current place of use under these water rights during years when abundant water supplies are available. The SRBA claims describe an irrigated area of up to 3,287 acres. This figure should be considered a maximum, because Camas Creek water is generally not available for irrigation of the full 3,287 acres.

ASCS records indicate an average irrigated area of more than 2,500 acres in the years 1991-93. Laird's own investigation of the irrigated area indicates that the Camas Creek irrigated area in most years includes approximately 2,297.2 acres in ASCS numbered fields and an additional 428 acres of irrigated pasture, for a total irrigated area of about 2,725 acres. Many of these acres are not irrigated late in the season after Camas Creek flows have declined. Some of these acres have received supplemental irrigation from groundwater under water right 31-7220.

Water master records for Camas Creek suggest an average 20-year diversion volume of 6,724 under the Laird rights. Assuming a diversion requirement of 3.5 acre feet per acre, the average annual diversion volume has been equivalent to full irrigation of 1921 acres. The place of use has been within the 3,287 acres claimed in the SRBA for the Camas Creek water rights.

Totals	4539	12050	39759	10895	67243	134486	

All of the water rights listed above are legitimate, decreed rights.

Analysis: $134486 \text{ a.f. per year} / 20 \text{ years} = 6724 \text{ a.f. per year}$.
An average of 6724 a.f. per year could be diverted off of this set of water rights.

The above figures do not include periods of non-use which occurred when the U.S. Fish and Wildlife Service called in their demand for priority waters.

The above figures do not include March, April, and December water uses for livestock watering, early Spring, or late Fall irrigation.

All the water rights listed above, have a record of use from May 1 to November 1.

The data above was taken from the Water Master's Water Reports.
This data was compiled by Don and Greg Shenton, Water Masters.

Signed: Donald W. Shenton 4/13/94
water master

$\frac{6724 \text{ a.f.}}{3.5 \text{ a.f.}} = 1921 \text{ acres}$

Water License No. 2096

WHEREAS, on the 4th day of June, A.D. 1906, JOHN A. JACOBY, of the County of Fremont, State of Idaho, duly made application (No. 2860) to me for a permit to use 3.2 cubic feet per second of the waters of Camas Creek, County of Fremont, State of Idaho, for agricultural purposes; and

WHEREAS, on the 4th day of June, A.D. 1906, Permit No. 2096 was issued to said JOHN A. JACOBY, for the completion of the works of diversion described on and before the 20th day of June, A.D. 1907, and for the application to beneficial use of said water on or before the 10th day of June, A.D. 1911, and

WHEREAS, On the 25th day of June, A.D. 1907, JOHN A. JACOBY transferred all his right, title and interest in and to said Permit No. 2096 to JOHN W. HAYS, Jr., and

WHEREAS, on the 29th day of June, A.D. 1907, JOHN W. HAYS, Jr., the holder of said permit, duly made proof of the completion of adequate works for the diversion of 3.2 cubic feet per second of said waters, as evidenced by my Certificate No. 2096, dated October 10th, 1907, concerning the same, and the works of sufficient capacity for diverting and conveying to the place of intended use 3.2 cubic feet per second of water, with date of proof, January 14th, 1908, and

WHEREAS, On the 22nd day of May, A.D. 1909, JOHN W. HAYS, Jr., transferred all his right, title and interest in and to said Permit No. 2096 to E. LAIRD and SONS, and

WHEREAS, On the 30th day of May, A.D. 1911, E. LAIRD and SONS, the holders of said permit, duly made proof of the application to beneficial use of 1.4 cubic feet per second of said water:

NOW, THEREFORE, By virtue of authority vested in me by the laws of the State of Idaho, I hereby grant and confirm to E. LAIRD and SONS, of Dubois, County of Fremont, State of Idaho, the holders and owners of said Permit No. 2096, a perpetual right, dating from June 4th, 1906, to the use of 1.4 cubic feet per second of the waters of Camas Creek, in the County of Fremont and State of Idaho, so much thereof as may be necessary for the purposes hereinbelow mentioned, to be diverted at a point in the Southeast quarter of the Northwest quarter (SE $\frac{1}{4}$ NW $\frac{1}{4}$), Section 17, Township 9 North, Range 37 East of the Boise Meridian, and conducted to and upon 70 acres divided as follows: (35 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 18, and 35 acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 19, Twp. 9 N., R. 37, E. B.M., for the purpose of irrigation and domestic use, subject, however, to the laws of the State of Idaho applicable to a license for the use of the waters of the State, and subject, also, to the local or community customs, rules and regulations which have been or may be adopted from time to time by a majority of the users from a common source of supply, canal or lateral from which such water may be taken, when such rules and regulations have for their object the economical use of such water.

WITNESS, my hand and the seal of my office at Boise, Idaho, this 10th day of October, A.D. Nineteen hundred and eleven.

A. E. Robinson
State Engineer

RE: Application for Transfer No. 4488

Dear Mr. Laird:

This letter is to acknowledge receipt of your relinquishment of the above referenced application. The Department has taken the steps necessary to void the permit in our files.

If you have any questions concerning this matter, please feel free to contact this office.

Very truly yours,

Harold W. Jones
Water Right Supervisor

RE: TRANSFER #4488 - LAIRD AND SONS

Dear Mr. Jones:

Thank you for your letter dated August 21, 1996 and the enclosed copy of the amended transfer application filed by the above referenced applicant. We are in the process of reviewing that amended application in an effort to determine whether it will be necessary to proceed with the protest which we have filed on behalf of the Idaho Power Company. As soon as that review and determination has been made, we will promptly notify you. We will make every effort to expedite this process and advise of our position with regard to the pending protest by September 20, 1996.

Very truly yours,

JAMES C. TUCKER

Re: Transfer 4488 - Laird & Sons

Dear Harold:

I received your letter dated August 21, 1996, regarding the above-numbered transfer application. Our firm's clients, and their technical experts, will review the information, but I believe I will be unable to provide you with a response prior to September 5, 1996. If that deadline is an absolute, then you may consider this as a reaffirmation of our clients' protest to this transfer application.

Yours truly

Re: Laird & Sons, Inc. Amended Application for Transfer of Water Rights.

Dear Ron,

Attached herewith is our amended application for transferring surface water rights for ground water rights at our farm southeast of Dubois, Idaho. Our original application was submitted on June 21, 1994. Since that time we have met with yourself and the other various groups expressing interest in this application. We have not been able to come up with a proposal that seems to meet everyone's liking; therefore, we ask that you proceed with the necessary advertisements, hearings, etc. on the application as submitted herewith.

Thank you very much.

Very truly yours,

Joseph A. Laird, P.E.
Vice President

RE: Transfer No. 4488 (Laird and Sons)

Dear Ron:

Due to reorganization within the Attorney General's Office, Steve Goddard has been reassigned and I will be representing the Idaho Department of Fish and Game (IDFG) in the above-referenced matter. IDFG protested the above transfer in December 1994 on the basis that it was not in the public interest. A pre-hearing conference was held in April 1994, but due to lack of notification, IDFG had to participate by telephone to discuss concerns regarding approval of the transfer. At the conclusion of the conference, it was IDFG's understanding that a proposal for addressing the concerns of all the protestants would be developed by the applicants and submitted for review.

IDFG recently has been informed that such a proposal has, in fact, been written and discussed with the applicants, their consultant, the local watermaster, and members of the Idaho Department of Water Resources. IDFG also understands that a copy of the proposal has been sent to one of the protestants for their review. To date, IDFG has not seen a copy of the proposal and would certainly be interested in receiving one. IDFG does not understand why it has apparently been left out of the information loop again, but would appreciate being brought up to date on what is transpiring in this case.

MEMORANDUM

Date: March 19, 1996
From: Jim Johnson
To: File
Subject: Conversation with Ray Rigby

=====

I contacted Mr. Rigby and discussed with him that there appeared to be two applications for transfer relating to Mr. Laird. One transfer had already been filed and assigned transfer no. 4488 and another one that Terry Scanlan was working on that had not yet been filed. When I talked to Terry he felt that the transfer application that was previously filed probably should be replaced or withdrawn. Mr. Rigby said he would pursue the matter with Joe Laird and get back to me. I don't see that any other department action is necessary at this time. This conversation memorandum is prepared rather than writing a letter in response to Mr. Rigby's letter of March 4, 1996.

Subject: Camas Creek Water Right Transfer Proposed by Laird and Sons, Inc.

Dear Jim:

Enclosed for your review are portions of the draft water right transfer that we discussed in our telephone conversation today. I am supplying this information at an early stage in the transfer application development to give you a better idea of the proposed water right change. Your thoughts on how to accomplish the proposed change would be appreciated.

Note that there are several portions of the transfer application missing.

- I have not completed the Part 2 portion of the application yet, but water right proof reading reports and SRBA claimed place of use are enclosed for your information. Note that the SRBA applications more correctly describe the current use of the rights than the original decree. Should the SRBA claim information be included in Part 2?
- A map is attached which shows the locations of the main ditches and the proposed circles. A more detailed map will be developed for the application.
- The application refers to Attachment E, which describes the diversion system. This attachment has not been completed yet; components of the system are shown on the map.

I have also enclosed diversion records compiled by the water master. I anticipate that these records, along with additional evidence of irrigation use (ASCS photos, crop reports, or satellite imagery), will be submitted with the final transfer package.

Please contact me with any questions. I look forward to your comments concerning this proposed transfer.

Sincerely,

Terry M. Scanlan, P.E., P.G.

PART 3 - MAP of NEW POINTS
OF DIVERSION & NEW
PLACES OF USE
(CLAIRD & SONS APPLICATION)

DRAFT

Attachment A - Explanation of Proposed Transfer

The applicant proposes to change the nature of use, place of use, and season of use of an existing surface water irrigation right to allow the water to be diverted into underground storage and subsequently withdrawn from wells for center-pivot sprinkler irrigation.

The transfer is structured to result in no negative impacts on other water users as a result of the change in water right. To accomplish no negative impact, the applicant will provide the equivalent aquifer recharge benefits of past flood irrigation practices, plus store an additional recharge volume equal to the irrigation volume to be pumped out. The proposed locations of recharge are in the near vicinity of proposed wells and of past flood irrigation.

The applicant proposes recharging 3.5 acre feet of surface water for every acre irrigated from groundwater storage. The net effect will be about one acre foot of excess groundwater recharge per acre irrigated. A 2.5 acre foot per acre sprinkler irrigation diversion requirement, 2.0 acre foot per acre consumptive irrigation requirement, and an 80 percent irrigation efficiency are assumed following the transfer.

Historic use of the water rights suggest an average fully irrigated area of 1,921 acres. This is based on a 20-year Camas Creek diversion average of 6,723.5 acre feet (from watermaster records) and a local flood irrigation delivery requirement of 3.5 acre feet per acre. Therefore, if 1,921 acres are irrigated each year following the transfer, the project must recharge a minimum average volume of 6,723.5 acre feet, of which about 4,802.5 acre feet will be pumped back from groundwater storage for irrigation, and 1,921 acre feet will remain in the aquifer as an annual net recharge benefit. Additional recharge benefit might be achieved from irrigation losses, although the amount will be minimal from the efficient center pivot sprinkler systems that are proposed.

Accounting of recharge and discharge will utilize a 5-year running average. Irrigated acreage will not exceed 1,921 acres in any year. If the 5-year average recharge volume falls below 6723.5 acre feet, the applicant shall reduce the irrigated acreage by one acre per 3.5 acre feet of average recharge deficit.

Recharge will be accomplished through use of dedicated recharge facilities (ponds or injection wells) and existing ditches. Use of existing the ditches will allow the applicant to maintain stockwater use. The applicant shall take necessary measures to prevent the water from running over the top of the ditches, where it would be consumptively used by pasture grasses. The water master will measure diversions from Camas Creek for recharge purposes. All well pumps will be equipped with totalizing flow meters. The applicant will report annual irrigation volumes and crop acreage to the Department.

The proposed transfer does not disrupt the existing surface water delivery structure on Camas Creek, so that downstream or upstream surface water users will not be benefited or injured by the transfer. The groundwater storage component provides for reduction

MICROFILMED

JUN 24 1999

in irrigation diversions in the event of extended drought, which should provide protection to other groundwater users. In addition, the applicant proposes to recharge approximately 40 percent more water than will be subsequently pumped for irrigation, which should be beneficial to other groundwater users. The applicant will lose the ability to irrigate large areas of the property with floodwaters, but will gain a dependable water supply to irrigate a smaller land area growing higher value crops. The applicant will benefit in crop planning because water supply reductions during drought periods could be anticipated a year or more in advance due to the running 5-year average. As a result, the land can be farmed efficiently without the fear of losing the irrigation source late in the irrigation season.

 Right # 31-00323 1913 (10. CFS)

All of the water rights listed above are legitimate, decreed rights.

Analysis: 134486a.f. per year/20 years = 6724a.f. per year.
An average of 6724a.f. per year could be diverted off of this set of water rights.

The above figures do not include periods of non-use which occurred when the U.S. Fish and Wildlife Service called in their demand for priority waters.

The above figures do not include March, April, and December water uses for livestock watering, early Spring, or late Fall irrigation.

All the water rights listed above, have a record of use from May 1 to November 1.

The data above was taken from the Water Master's Water Reports.
This data was compiled by Don and Greg Shenton, Water Masters.

Signed: Donald W. Shenton 4/13/94

Storage for irrigation is the maximum volume that could be stored in a 5-year period. Irrigation from storage is limited to 2.5 acre feet per acre per year, up to a maximum of 4,803 acre feet (1,921 acres x 2.5 acre feet per acre) in any year.

DRAFT ONLY
LETTER FROM SCANLAN

Subject: Camas Creek Water Right Transfer Proposed by Laird and Sons, Inc.

Dear Jim:

Scanlan Engineering has recently been retained by Laird and Sons, Inc. (Laird) to assist in a proposed transfer of water rights at the Laird property along Camas Creek near Dubois. Laird currently irrigates with surface water from Camas Creek using several decreed water rights of various priorities. A transfer application (Transfer No. 4488) was submitted by Laird in 1994. Transfer No. 4488 sought to change the source of irrigation supply for nine decreed water rights from surface water (Camas Creek) to groundwater. This transfer application was subsequently protested by a number of parties and has not been resolved.

At this time, I would like to determine a way to modify Transfer No. 4488 to accomplish its purpose and yet resolve the concerns of the protestants. I would hope that we can resolve the protests by showing that the transfer (1) will not increase the consumptive water use associated with these water rights, (2) will not result in an enlargement of these or other water rights, and (3) will not decrease the availability of water to fill existing surface water and groundwater rights.

Description of Existing Laird Water Rights

I understand that an initial evaluation of the Laird water rights has been conducted by Department staff and Laird, in preparation of Transfer No. 4488. The evaluation looked at surface water diversions to the Laird property over the past 20 years (as reported by Don Shenton, District 31 Water Master). According to the evaluation, the historic diversion volumes have been equivalent to full irrigation (3.5 acre-feet/acre flood irrigation per annum) of an average area of approximately 1921 acres. The decreed water rights are claimed in the SRBA for ___ acres. Eight of the nine decreed rights list places of use in 40 quarter-quarter sections, suggesting a decreed place of use of less than 1600 acres for those rights. The ninth decreed right (31-00323 for 10.0 cfs) does not list a place of use, but has had an average delivery of 545 acre-feet per year (156 acres). Joe Laird has indicated that the historically irrigated area is approximately 2,725 acres. I understand that protestant USEWS is concerned that the

UNFILMED
JUN 24 1999

Mr. Jim Johnson

DRAFT

July 5, 1995

average irrigated land area may have been less than 1921 acres. Therefore, the acreage determination will need to be fully resolved in order to complete the transfer. For purposes of discussion in this letter, I will assume that 1921 acres is the correct figure, but that the 1921 acres may be adjusted based on further investigation.

Transfer Options

Through the transfer process, Laird would like to convert the irrigation water source from surface water diverted from Camas Creek to groundwater diverted from wells. Such a conversion will provide a more dependable and efficient irrigation supply to the Laird property. As part of this conversion, Laird does not want to lose its water right priority dates. I see two options to accomplish this goal, although other options may be available.

Option 1 - Direct Change from Surface Water to Groundwater. The first option, which is preferred by Laird, is to simply change the source for the water rights from surface water to groundwater. The acreage of historically surface water irrigated land (on a 20-year average) would be determined to the satisfaction of the Department and potential protestants. The transferred water rights would allow groundwater irrigation of this historically surface water irrigated land area. The priority dates for the transferred water rights would be equal or equivalent to the priority dates of the surface water rights. The surface water would no longer be diverted, but instead would flow down Camas Creek to recharge groundwater or be diverted other water users (i.e., USFWS, Mud Lake canal companies).

I see some potential management problems with this approach, particularly with respect to priority dates and potential enlargement of other water rights. However, these problems might be resolved through careful conditioning of the transfer and management of diversions. I do not know if this approach has ever been used in Idaho, but Mr. Laird has indicated that his research shows that it has been used successfully in Colorado.

This option is advantageous in its simplicity, but is complicated in application. It also may result in a slight change in the hydrologic balance of the area, as the location of recharge will change from the Laird fields and delivery ditches to Camas Creek and Mud Lake.

Option 2 - Change Surface Water Irrigation Rights to Groundwater Recharge Use and Irrigate from Groundwater Storage. The second option would be to transfer the nature of use of the surface water rights to groundwater recharge, and to apply for new permits for groundwater storage and irrigation from groundwater storage. Under this scenario, Laird would continue to divert surface water from Camas Creek when it is available, but would route the water to a recharge basin near the center of his property where it would infiltrate into the aquifer. This option would allow Laird to directly retain the priorities associated with the surface water rights, and also allow Laird to convert from surface water supplied flood irrigation to a more efficient and dependable groundwater supplied sprinkler irrigation system.

MICROFILMED
JUN 24 1999

Mr. Jim Johnson

- 3 -

DRAFT

July 5, 1995

I suspect that the new permit for irrigation from storage would allow pumping to the historic irrigated acreage (or at least an equivalent number of acres), but would be limited to a running five-year recharge average. Laird would also be required to divert more water to recharge than is subsequently pumped from wells for irrigation. For instance, Laird might be required to divert 3.5 acre feet to recharge for each 2.5 acre feet pumped from groundwater into a sprinkler system. Laird could divert to recharge as much water as allowed under the decreed surface water rights, in order to build up the groundwater storage "account" as much as possible. If the running average of recharge did not provide enough water to irrigate the full 1921 acres (i.e. 6723 acre feet), then Laird would have to proportionately reduce the irrigated area. If the running average of recharge provided water than needed for more than 1921 acres, Laird would still be limited to only 1921 acres.

Option 2 has the advantage that it does not disrupt the existing surface water delivery structure on Camas Creek, so that downstream or upstream surface water users will not be benefited or injured by the transfer. The groundwater storage component provides for reduction in irrigation diversions in the event of extended drought, which should provide protection to other groundwater users. In addition, Laird would recharge at least 40 percent more water than is subsequently diverted, which should be beneficial to other groundwater users. Laird would lose the ability to irrigate large areas of the property with floodwaters, but would gain a dependable water supply to irrigate a smaller land area growing higher value crops. Laird would benefit in crop planning because water supply reductions during drought periods could be anticipated a year or more in advance due to the running 5-year average. As a result, the land could be farmed efficiently without the fear of losing the irrigation source late in the irrigation season.

Additional Study Needed

With either transfer option, several tasks would remain to be completed. These tasks are detailed below.

- The average consumptive irrigation water use under the surface water rights will need to be determined to establish the equivalent area receiving full irrigation. This will probably require a more detailed evaluation of surface water deliveries. Estimated pumping volumes and place of use under groundwater right 31-7220 will also need to be estimated. In addition, aerial photography, Landsat imagery, ASCS crop records, and other data sources will need to be studied to establish past water usage on the property.
- Transfer conditions will need to be negotiated to provide assurance that existing water rights will not be injured or enlarged by the proposed changes.

MICROFILMED
JUN 24 1999

Mr. Jim Johnson

- 4 -

DRAFT

July 5, 1995

- If option 1 is pursued, a study is needed to evaluate the fate of the water left in Camas Creek to demonstrate that the transfer will not result in the enlargement of downstream water rights.
- If option 1 is pursued, a computer modeling study is warranted to determine the impacts on other groundwater users resulting from allowing the water to recharge along Camas Creek rather than being diverted to the Laird property.
- A computer model is probably needed to model impacts from option 2, because the center of the place of use will shift about one mile north, and the actual recharge location will need to be modeled. However, the irrigated and recharge areas will not change significantly, so that adverse impacts are not anticipated.
- If option 2 is pursued, a recharge project conceptual design is required to show that the water can be diverted from Camas Creek and recharged into the aquifer without excessive evaporation and transpiration losses, and without impact to groundwater quality.

Please contact me to arrange a meeting to discuss these potential transfer options. I am interested in the Department's position with regard to the transfer options discussed in this letter, or other options that could accomplish the general purpose of the proposed transfer.

Sincerely,

Terry M. Scanlan, P.E./P.G.

Subject: Meeting with Jim Johnson of the Idaho Department of Water Resources

Dear Joe:

On August 1, I met with Jim Johnson (Water Rights Section Supervisor for the Idaho Department of Water Resources) to discuss your proposed water right transfer. I indicated that your goal was to transfer the source of your existing surface water rights to groundwater, and to maintain your priority dates as part of the transfer. We also briefly discussed the Colorado cases that allowed a water right to change from a surface water point of diversion to groundwater point of diversion.

The results of my discussions with Johnson suggest that a straight change from surface water to groundwater is not feasible in this case for at least two reasons.

- First, Camas Creek has never been a reliable late season irrigation source, even before groundwater pumping became a significant source of water in the area. Therefore, allowing late season groundwater pumping might be considered an expansion of the water right as it currently is structured. To prevent an expansion, some sort of storage component is needed in the water right to allow late season diversion when Camas Creek is no longer flowing.
- Second, groundwater pumping has little or no effect on the flows in Camas Creek because Camas Creek is perched far above the water table in the vicinity of your farm. The Colorado cases that you cited (primarily Templeton vs. Pecos Valley Artesian Conservancy District) were predicated on the fact that the water table had declined, as a result of groundwater pumping, from above the stream bed to below the stream bed. This is not the situation that you are faced with, as the water table in your area has always been far below the Camas Creek stream channel. Therefore, you are not chasing a water table that is declining from the stream channel level into the underlying alluvium.

Johnson and I discussed the option of allowing the Camas Creek water to percolate down to the water table for the purposes of recharge. The recharge could take place in either the Camas Creek streambed or at an off-stream recharge point. Johnson said that measuring the water at your diversion, and then allowing the water back into the stream channel for recharge purposes would be a problem because it is difficult to claim possession of

MICROFILMED
JUN 24 1999

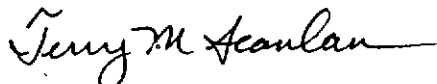

the water when it is returned to its natural channel. Instead, an off-stream recharge source would be preferable, so that you can take possession of the water at the diversion point, and maintain possession of the water during the recharge and storage processes. I tend to agree with him on this point, because potential protestants of the water right transfer will claim that much of the water during high flow periods is not going to groundwater storage. Instead, it is going into storage at Mud Lake where it will subsequently be used for irrigation or be lost to evaporation. The amount of water that you put into Mud Lake will have a negligible effect on Mud Lake seepage; furthermore, the location of recharge from Mud Lake seepage (i.e., in the Mud Lake barrier vicinity) might not be beneficial to most of the potential protestants. Recharging the water in the vicinity of your existing diversion point is the best approach to satisfying concerns of all of the protestants.

Assuming that you can develop a method to recharge the surface water, Johnson proposed that the nature of use of your Camas Creek water rights be changed by adding the following additional uses: diversion to storage (cfs), storage for irrigation (acre feet), and irrigation from storage (acre feet). The source of the water rights (Camas Creek) and the priority of the water rights would remain unchanged. The transfer would need to be conditioned based on some sort of measured recharge volume. The storage would have a volume cap (equivalent to perhaps five years of recharge volume), and could be accounted for in the same manner as a surface water storage facility. Alternatively, you might want to go with a running average. Johnson suggested that there is some precedence for using a five-year period, which is the time period utilized by water users in the Golden Valley area and by Blaine Larsen in the Dubois area. You indicated in your letter a preference for a 10-year running average; I don't see any problem in proposing a 10-year average, although you may be forced to settle for a 5-year average.

Your letter of July 17 indicated that there are problems in Camas Creek resulting from decreased stream flows caused by beaver dams in the Kilgore area. This may be a difficult issue to resolve in the context of future water supply for artificial groundwater recharge. It would be helpful to know how much stream flow depletion is being caused by this problem.

Please contact me to discuss these issues.

Sincerely,

Terry M. Scanlan, P.E., P.G.

Re: Laird Water Rights Transfer

Dear Terry,

Enclosed herewith are the ASCS Crop Reports for 1986 through 1993. These reports show the field number, whether it was irrigated or not irrigated and the type of crop grown on the field that year. Actually the crop reports were for the purpose of recording whether or not wheat, barley or oats were grown on the fields. Whether the fields were irrigated or not was of very minor importance at the time so not much attention was given to this aspect of the report. You will note that the farther back in time one goes, the less complete the reports are. Prior to 1986 the fields had different field numbers, so one cannot correlate the old reports with any particular fields under the existing numbering system. Some of the fields have different numbers now than they did in 1986. When fields were split into different uses for a period of time they were also given an alpha-numeric symbol for the year, i.e. 26 & 26A or 39, 39A & 39B, etc. Also enclosed are some aerial photographs showing the fields and their numbers. The letters CRP stand for Conservation Reserve Program which is a government program where you plant the ground to grass and can't hay or graze it for ten years. The letters SACVR means it was plowed and left fallow for the year.

Also enclosed is a paper entitled "Conjunctive Use of Groundwater and Surface Water" that Ray Rigby gave me. He underlined the parts that he felt had some bearing upon our situation. I have marked in yellow the cases that I thought were of significance. (18 - Templeton & 20- Langenegger) Ray Rigby is our attorney for this case. You can reach him at: (208) 356-3633 and 25 North 2nd East, Rexburg, Idaho 83440. We need to keep him aware of and get his opinion on anything we plan to do.

I will review your proposed letter to Jim Johnson with Ray Rigby. At the moment, my opinion is that we need to keep a more positive attitude on the 1921 acre figure. You may want to discuss this with Harold Jones of the IDWR at Idaho Falls to see how firm he is on this figure (as he derived it) and the acreages he checked from the Landsat photos. You should have a copy of our Amended Application by now. This had an Attachment "D" (copy attached and labeled "Amended") listing the land under irrigation. The problem is proving that it was actually irrigated, particularly the irrigated pasture outside of the ASCS numbered fields and ASCS fields 95,96,98,99,100,101,102, 105 & 106 which were only partially irrigated (or in low water years not watered at all). Some of the other ASCS fields were also only partially watered during low water years. The irrigation water starts at the upper fields. The tail water from these fields goes into another ditch which spreads it out on other fields. The tail water from these fields is then caught in another ditch which, in turn, spreads the water out on other fields, etc. until all of the water has been used up. During most of the 20 year period, most of the fields got irrigated. During the last few bad drought years, only the better 2/3 or so of the fields got irrigated. Also

MICROFILMED
JUN 24 1999

attached is the original "Attachment D" that was included in our original submittal to the IDWR. (This is enclosed and marked "Original") This is the list of lands we thought we were irrigating in 1987 when we filed the Water Applications for the Adjudication Proceedings. I don't know whether this filing had any significance or not, but we were told at the time that it did.

I would much prefer that you try to convince yourself and the IDWR that your Option 1- Direct Change from Surfacewater to Groundwater is the best way to go. I get the impression that the local IDWR people would like to see it measured at our two places of diversion and then put back into Camas Creek where it can seep away into the groundwater between our place and Hamer or go on to the Bird Farm and Mud Lake where it can seep away into the underground system as recharge. If the IDWR does not let any more ground water be used for new fields in the Mud Lake area, will this "extra" water not then become part of the "overall groundwater" and make everybody happy?

If we have to go with your Option 2, I would like to be able to retain up to 150% of the 20 year average value of 6723 Ac. Ft. (by minimal water use in 1995 and 96) and thereafter using water on a 10 year running average. We, of course, may have to sue the Idaho Dept. of Fish and Game to get them to remove all of their transplanted beavers from the Kilgore area that are presently damming up the creeks and giving the Camas Creek water to those people by sub-irrigation. This is the main reason why I don't like your proposed Option 2. Much of the water is presently being usurped by the beaver, the U.S. Forest Service and the IDF&G before it ever gets down to us to be counted. We've spent the last three years with this problem and can't get any action out of either the IDWR or the IDF&G and I don't see this changing unless it is through some sort of a law suit.

Regarding the "Additional Study Needed" that you mention in your proposed letter, I don't believe our records are extensive enough and detailed enough to do much of this extensive study work. We, of course, want to do whatever is necessary to get this transfer approved, however you should know that we don't have the "deep pockets" that Blain Larsen does so let's keep it as simple as possible.

Attached is a check for your Invoice No. 95-108 in the amount of \$200.00.

Very truly yours,

JOSEPH A. LAIRD, P.E.

RE: Transfer No. 4488 (Laird and Sons)

Dear Mr. Carlson:

The United States Fish and Wildlife Service (USFWS) is a protestant in the above transfer proceeding. A pre-hearing conference was held in April of 1994. At the conclusion of the conference it was our understanding that a proposal for addressing the concerns of all protestants would be developed by the applicants and submitted for review.

We have been informed that such a proposal has been written and discussed by applicants and their consultant with the local watermaster and members of the Idaho Department of Water Resources. We also understand that a copy of the proposal has been sent to one of the other protestants for review. We have not seen a copy of the proposal but would like to receive one for review.

In the future we would like to be included in all matters related to this case. Thank you for your time and prompt consideration on this matter.

Sincerely,

Barbara Scott-Brier

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF APPLICATION	)	
FOR TRANSFER NO. 4488	)	NOTICE OF PREHEARING
<u>IN THE NAME OF LAIRD AND SONS, INC.</u>	)	CONFERENCE

On June 21, 1994, Laird & Sons, Inc. filed with the Department of Water Resources an application for transfer of right No. 4488. The application was protested by Gary Slette, of Rosholt, Robertson, & Tucker, on behalf of Twin Falls Canal Co. and North Side Canal Co.; U.S. Fish and Wildlife Services; Kent Foster, of Holden, Kidwell, Hahn & Crapo, on behalf of Owsley Canal Co., Jackett Canal Co., Holley Water Users, Jefferson Irrigation Co., Producers Canal Co., Montevieu Canal Co., and Independent Water Users of Mud Lake, Inc.; James Tucker of Rosholt, Robertson & Tucker, on behalf of Idaho Power Co.; and Idaho Fish & Game.

The Department has scheduled the matter for a prehearing conference at 9:30 a.m. on Tuesday, April 18, 1995, in the conference room, at 900 N. Skyline, Idaho Department of Water Resources, Idaho Falls, ID.

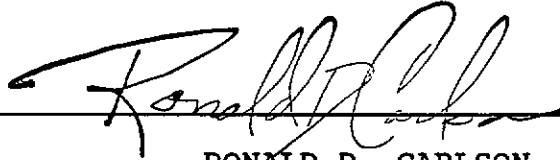

If you plan to offer exhibits for the record, note that IDAPA Rule of Procedure 37.01.01606 requires that you provide a copy of exhibits to each party and to the presiding officer.

The conference will be conducted in a facility which meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the conference, please advise the

MICROFILMED
JUN 24 1999

Department within (10) days prior to the conference. All parties to the matter will have the opportunity to respond and present information and argument on all issues involved.

Dated this 13th day of March, 1995.

A handwritten signature in cursive script, appearing to read "Ronald D. Carlson", is written over a horizontal line.

Affidavit of Publication

STATE OF IDAHO }
COUNTY OF TWIN FALLS } SS.

No 26605

I Linda Capps McBaine being first duly sworn upon oath, depose and say that I am Linda Capps of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for Two consecutive weeks, commencing with the issue dated November 24, 1994, and ending with the issue dated December 1, 1994.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 1 day of December in the year of 1994, before me, a Notary Public, personally appeared Linda Capps McBaine, known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

LAIRD AND SONS INC
PO BOX 145
DUBOIS ID 83423

RE: Application for transfer No. 4488
Laird & Sons, Inc.

Dear Mr. Laird:

Enclosed is a copy of a protest filed against the issuance of a transfer. The Department suggests you contact the protestant directly in an effort to determine the nature of the protest and to attempt to resolve the protest.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protest. At a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for transfer (Sec. 42-222, Idaho Code):

1. Are other water rights injured by the transfer?
2. Does the change constitute enlargement in the use of the original water right?
3. Is the change consistent with the conservation of water resources within the state of Idaho?
4. Does the change conflict with the local public interest?

MICROFILMED

JUN 24 1999

Laird and Sons, Inc.
Page 2

The applicant must be prepared to present evidence and/or testimony addressing each of the four items. Although representation by legal counsel is not mandatory at a proceeding before the Department, you may retain an attorney in your behalf.

If this office can be of further assistance, please contact us.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

RE: Application for transfer No. 44888
Laird & Sons

Dear Ms. Scott-Brier:

Your protest against approval of the above referenced application for transfer has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

Unless this office is advised that either the matter has been resolved or there exists extenuating circumstances, our objective is to schedule a conference and/or hearing in the near future to consider the protest. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application (Sec. 42-222, Idaho Code):

1. Are other water rights injured by the transfer?
2. Does the change constitute enlargement in the use of the original water right?
3. Is the change consistent with the conservation of water resources within the state of Idaho?
4. Does the change conflict with the local public interest?

Re: Application of Laird and Sons, Inc., for Change of Water Right No. 4488 (water rights nos. 31-00238, 31-00239, 31-00125, 31-00127, 31-00124, 31-00126, 31-00167, 31-00128, and 31-00323.)

Gentlemen:

Pursuant to Idaho Code § 42-222, the United States Fish and Wildlife Service (Fish and Wildlife Service) protests the application filed by Laird and Sons, Inc. (applicant), for change of water rights nos. 31-00238, 31-00239, 31-00125, 31-00127, 31-00124, 31-00126, 31-00167, 31-00128, and 31-00323. Applicant seeks to change the point of diversion, place of use, and source, from Camas Creek tributary to Mud Lake to groundwater, for each right.

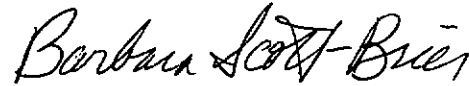

This protest is filed upon the grounds and for the reason that the proposed change may injure water rights of the Fish and Wildlife Service, that the proposed change may constitute an enlargement in use of the original right, that the proposed change may be inconsistent with the conservation of water resources within the State of Idaho, and that the proposed change is not in the local public interest. The Fish and Wildlife Service has not had sufficient time to fully research the proposed transfers and potential impacts.

The Fish and Wildlife Service would be interested in meeting with the applicant, other interested parties, and the Department of Water Resources (Department) to attempt to resolve this matter. If you have any questions or wish to discuss any of these matters, please call me at the number provided below. Copies of all filings and correspondence should be sent to me, as follows:

RE: Proposed change of water right no. 4488 (Laird and Sons)

Dear Mr. Carlson:

Idaho Department of Fish and Game (IDFG) personnel have reviewed the legal notice for the above-referenced transfer of a water right. IDFG wishes to protest the transfer on the basis that it is not in the public interest. We cannot determine from the information in the notice what impacts may occur to IDFG water rights at Mud Lake, Market Lake, nor to fish and wildlife resources in the Henry's Fork of the Snake River. IDFG personnel have not had sufficient time to fully research the proposed transfer and potential impacts.

IDFG subscribes to the Department of Water Resources Weekly Water Rights Print Out and did not find the above transfer listed in that publication. IDFG became aware of the transfer via word-of-mouth from other interested parties.

IDFG would like the opportunity to meet with the applicants and other interested parties to discuss potential impacts of the transfer and possible conditions under which the transfer may be approved.

If you or your staff have any further questions regarding this protest, please contact Cindy Robertson at 334-2597. Please return a receipt for payment for check number 153356.

Sincerely,

Cal Groen, Chief
Natural Resources Policy Bureau

Re: *Application by for transfer of water rights by Laird & Sons, Inc.*
Transfer No. 4488

Gentlemen:

We have been requested by our clients, Owsley Canal Company, Jackett Canal Company, Holley Water Users, Jefferson Irrigation Company, Producers Canal Company, Montevue Canal Company and Independent Water Users of Mud Lake, Inc., to protest the application filed by Laird & Sons, Inc. for the transfer of water rights Nos. 31-00238, 31-00239, 31-00125, 31-00127, 31-00124, 31-00126, 31-00167, 31-00128, and 31-00323.

This protest is filed on the grounds and for the reason that the proposed change will injure water rights of the protestants, that the proposed change may constitute an enlargement in use of the original right, that the proposed change may be inconsistent with the conservation of water resources within the State of Idaho, and that the proposed change is not in the local public interest.

Very truly yours,

Kent W. Foster

and 31-00323)
Applicant: Laird and Sons,)
Inc.)

NOTICE OF PROTEST

Twin Falls Canal Company and North Side Canal Company (hereinafter the "Companies"), by and through their attorneys, Rosholt, Robertson & Tucker, file their Notice of Protest to the approval of the Proposed Change of a Water Right Numbers 31-00238, 31-00239, 31-00125, 31-00127, 31-00124, 31-00126, 31-00167, 31-00128 and 31-00323 filed in the name of Laird and Sons, Inc. The basis for the Companies' protest is as follows:

1. The application filed by the applicant seeks to change the points of diversion for the above-numbered rights from surface water diversions to groundwater diversions in the trust water area. According to the USGS, such change would negatively impact surface water flows in the non-trust water, which surface water flows are tributary to the flow of the Snake River above Milner Dam.

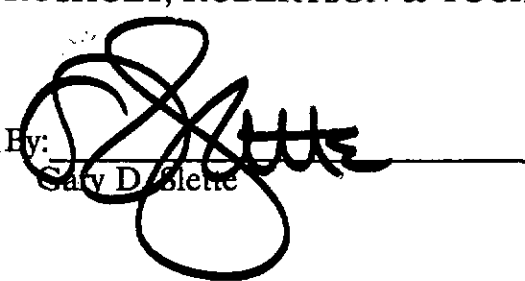

REPROFILMED

JUN 24 1999

1 2. The proposed changes in points of diversion described in the aforesaid
2 application would violate all or a portion of the criteria set forth in Idaho Code Section
3 42-203(A)(5), and specifically, would cause injury to the rights of the Companies.

RE: Application for Transfer No. 4488

Dear Mr. Laird:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Post Register and statewide on November 24 & December 1, 1994. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State Office Personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Harold W. Jones
Water Right Supervisor

HWJ/rb
