Allen has both of these files for final region review. The applicant can request an expedited drilling permit if they don't want to wait for final approval.

Jim -

Can you shed any light on the status of these applications?

Terry Scanlan

Terry,

The application for permit has not been forwarded to Boise from the regional office yet. I suspect that the transfer is attached to the application for permit so they can be reviewed as a package.

Shelley -

Any news that you can give me on status of application for permit 37-21177 and application for transfer 71677 for Blaine Co. School District? I understand neither application was protested. The school district has a driller lined up, and would like to start well construction next week. I assume that we will need to postpone, but would like to give them an idea about when they could reschedule. Thanks.
