RE: Water Right No. 45-07588

Dear Permit Holder:

The Department of Water Resources is reviewing water appropriation permit 45-07588, issued to you in 1995, in preparation for issuing a water right license. Our reviewer has indicated that before a license can be issued your permit must be amended to depict your places of use and points of diversion as they were actually developed. In addition, it was noted that you have already submitted an application to amend your season of use. For efficiency purposes, I recommend addressing the season of use and the place of use and point of diversion on the same amendment form.

I have enclosed an Application for Amendment form that contains the point of diversion place of use, and season of use changed. The last page of the Application for Amendment form contains a list of proposed conditions and that may be modified upon further administrative review. Please review the amendment form carefully. If you concur with the information presented, sign the form and return it within fourteen days. You will also need to complete the enclosed withdrawal form so that your earlier application for amendment can be replaced with the new one. The amendment fee you paid in 1997 will be applied to the new combined form.

If you have any questions about this information, please contact me at (208) 327-7946 in Boise.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor
