Attn: Grant Wyatt

Dear Mr. Wyatt:

In May, two applications for ^{amendment} ~~permit~~ were submitted to change the season of use under Permit Nos. 45-07567 and 45-07588. The field exam reports have been forwarded to our office for review to issue final licenses for these rights. We would like to process the amendment applications previously submitted as amendments for licensing purposes. What that entails is that the amendments would be modified in line with the information obtained by the examiner.

Attached are copies of the amendments as they would be modified for licensing processing. The point of diversion and place of use descriptions are only slightly different from what was permitted. The only major changes are in the rates of diversion. For Permit No. 45-07567, the rate of diversion to be licensed (18.1 cfs) is based on the highest diversions of record (July 1995). For Permit No. 45-07588, the rate of diversion to be licensed (15.76 cfs) is based on flume capacities. Please review these documents and give me a call to let me know if you agree with the modifications so that we can issue the licenses, or if you have any questions or concerns that we need to work through.

I look forward to hearing from you.

Sharla Curtis
Water Resource Agent
