RE: Applications 74-15450, 74-15577, 74-15579

I met with Alan Bittner from the Salmon office of the BLM on 2 May 2005. We discussed the errors on each of the applications.

Alan stated that each of the PODs and POUs was GPSed and that the maps were correct. The BLM data enters the GPS locations into arc view then prints the arc view maps.

Alan agreed that the incorrect locations should be changed to reflect the map locations.

The applications do not need to be re-advertised. The PODs and POUs are on BLM or Forest Service/ BLM joint grazing allotments. There are no intervening points of diversion that would be impacted.
