WATER RESOURCES

In review of this application I found the place of use should be located in SENE, Sec. 04, T18N, Rge. 23E rather than NESE, Sec. 04.

The trough in the NESE is already covered under Rt. 74-7027 (in remarks on the application it states this is an additional POU to existing Sagehen Flat Spring under 74-7027), but there is no existing right on the trough in SENE. This application appears to have been submitted without the place of use being completed (as far as I can tell) and it may have been added at the region??? NO! DMD

My questions is this: Do you want to readvertise this application with the place of use correction described above? Please let me know so I can either send back to you or correct and approve without readvertising. Thanks. Kay

Shelley (SWK)

Returning to Eastern per above.

Kay
