4. kwalker 5/24/2005 Permit Review

Comment: Application falls within ESRPA, Trust Water area and East Water Msmt. District. Application was protested by canal companies and in order to resolve suggested conditions of approval have been attached to proposed permit. Application states they will develop two wells for this subdivision. Region only advertised and entered one point of diversion but this has been corrected. Also found the place of use to be located differently than applied for and advertised. Region does not want to readvertise due to the place of use error. Recommend approval.
