Subject: Application for Permit 15-7268

Hi, Dennis... When I put the place of use for this application into arc view I found the place of use to be different than that shown on the application. It appears that the GCBD is off a little bit but not enough to cause so many changes to place of use description. I could only come up with 32.1 acres (which is not a problem) but found the place of use to be in the S1/2NE, and SE1/4. The application only describes use in SWNE, N1/2SE, AND SWSE. Don't know if you want to revise this one or go ahead and approve as it was submitted. Please advise which way to go on this one. We could request an amended application to cover all the 40's that the place of use touches so that he won't have to amend in the future. What do you want to do? Thanks. Kay
