RE: Water Permit 37-7844

Dear Ms. Jevne;

The above-referenced water permit covers the pump that Clarence Mecham installed in the Little Wood River before you bought this property. Our information is that the river changed course in 1997, so no water was available after that. In order to keep the pump running, the watermaster has delivered canal water to it. If this is correct, then the development covered by the permit has been abandoned; in this case, you can relinquish the permit or we can cancel it. The permit should only be good if the pump was moved to the new river channel where it could again use water that seeped into the diversion structure.

If you are willing to relinquish this permit, please fill out the enclosed form and return it to me for processing. If the pump is now able to use seep water when it is available, please let me know so that I can update our files. I would not try to complete a licensing examination now, as I doubt if water is available or needed. But I would like to get this one "off the books" if you no longer use the permit.

Regards,

James E. Stanton
Sr. Water Resource Agent
