

TO: File

DATE: January 26, 1999

FROM: Jim Stanton

SUBJECT: Permit 37-07844, Darlene Jevne

Today I discussed this permit with watermaster Bob Simpson. He told me that the Little Wood River changed channels during high water in 1997, moving away from the irrigation pump covered by this permit. Ms. Jevne now supplies this pump with Little Wood Canal Co. shares; no direct-flow water reaches the pump. Unless the pump is moved back into the river channel, there will be nothing for it to pump under this permit. In this case, the permit should be cancelled for lack of development. I plan to resolve this matter in 1999 if possible.
