Re: Amended Transfer

On 5-9-05, Brockway Engineering submitted an amended application that creates a ppu of all the land on this farm. Right 37-20840 was added to the transfer, effectively withdrawing T71437. One well serves all 3 rights, plus 37-20841 that is owned by the BLM. The amended transfer covers the same tracts as the original 2 transfers, so does not need to be readvertised (an amendment fee is still required, however).

Proposed approval conditions have been adjusted to cover the additional right and the nature of the proposed ppu. The original apps were not protested. The amended app appears to be approvable.
