RE: Source Name for Water District #78D

IDWR issued an order on November 15, 2002, creating a new water district in Adams County. The order identified Campbell Drain as the water source for the district. IDWR database reflects that source name as noted in the attached copy of a query screen.

The water district was based on the 1932 Carey v Dryden et al decree. The decree specifies the source name as Campbell Swamp.

IDWR database does not have any records for Basin 78 with a source name of Campbell Drain but has several records with a source name of Campbell Swamp.

The 2002 order should be amended to correct the water district source from Campbell Drain to Campbell Swamp. The IDWR database should be updated to correct the catalog of water district names.

The mailing list from the 2002 order remains current with one exception. Hearn requested the addition of a second address as follows:

DAN HEARN
934 HILLSIDE TERRACE
RIO VISTA CA 94571

Hearn splits his time between Idaho and California. The best way to provide information to him is via both addresses, an acceptable inconvenience as IDWR tries to manage this thorny problem.

Ideally this would be corrected before a possible water district meeting in early February 2004.
