Subject: RE: 33-7093 and 33-7159 To Files

Keith,

Thank you for corresponding with New Energy Inc. and Jake Amy. It sounds to me like the field reports should be completed and licenses issued (if there is beneficial use) in case the claims are filed.

Shelley

Shelley,

I sent Jake Amy & New Energy Inc. the enclosed letters. For some reason I did not save the letters when I changed the letters to only include 33-7093 & 33-7159, so the letters also include rights 33-7177 & 33-7178.

On May 2, 2005, Jake Amy came into the office to discuss the permits. On December 31, 2006, the project will revert back to Jake Amy. Apparently he is having problems with getting New Energy to do anything. I told him that if he can get a notarized document authorizing him to file the claims then he could file on them. Jake does not expect them to do that much less file a late claim in the adjudication. When he left he indicated that he was going to see his attorney because New Energy should have filed. I don't know if the department could do anything for him.

Keith,

That sounds great. Have you communicated with the right holder about the need to claim 33-7093 and 33-7159 in the SRBA? If so, please include copies of your correspondence.

Thanks.

Shelley

Subject: FW: 33-7093 and 33-7159

Shelley,

For some reason I thought that the field exams had been submitted on 33-7093 & 33-7159, and in addition also on 33-7177 & 33-7178.

All four have had the field exam completed just looks like I need to make sure the write-up is complete and send them over.

Keith

Roger,

I've nearly finished integrating the SRBA partial decrees into Basin 33 and changing the status for the rights that were not claimed. There are only a few records remaining to be cleared up. Two of those are power permits that should have been claimed, but apparently were not. They are 33-7093 and 33-7159. Has anyone in your office conducted a field inspection and/or corresponded with the permit holder?
