Re: Issuance of Water Right License No. 63-12275

Dear Shelly W. Keen

The Mountain View Homeowners Association has enclosed receipts for the work done on eliminating the need to divert water in excess of the amount used. We thank you for the two-year "grace period" to implement our upgrades. Our upgrades consist of installing a VFD Drive, and 4-20m-amp transducer. The system now only runs on demand, which eliminates all water waste. We are still running our system seasonal to also reduce water use. We hope these changes meet State regulations and Idaho code.

If you have any questions please call Board member Gene Greer (585-9042) Mike Howard (585-6591), or write to: Mountain View Homeowners Association P.O. Box 743 Middleton, ID. 83644.

Thank you,
Board Members

RE: BID: # 1

TO: ATTEN: Gene Greer
Phone: Gene @ 585-9042
Address: 501 Valley St.
Middleton, Id. 83644

For: To control excess water from irrigation pump and to control pump motor so there is no need to dump the excess water into adjacent canal.

Suggested system control:

Install a 10hp 208v 3ph VFD {Variable Frequency Drive} system and attach it to the motor to control the motor speed and shut off so pump works on demand rather than running continuously and dumping the excess water in the canal.

Materials included in bid:

1- 10hp 208v 3ph VFD Drive system and Transducer:	inc.
Misc. fittings and parts to complete hookup:	inc.
Labor:	inc.

Total estimate:	<u>\$4208.50</u>
-----------------	------------------

This is a more costly installation, however I believe it will be the best choice and will give the best service for the money.

Any Question call above numbers:
Thanks, Jack Young

RE: BID: # 2

TO: ATTEN: Gene Greer
Phone: Gene @ 585-9042
Address: 501 Valley St.
Middleton, Id. 83644

For: To control excess water from irrigation pump and to control pump motor so there is no need to dump the excess water into adjacent canal.

Suggested system control:

Install a Cycle stop control valve in line in the system and install a 4.4gal. pressure tank with a pressure switch to control the excess water and stop the system from dumping the excess into the canal.

Materials included in bid:

1- Cycle stop valve:	inc.
Misc. fittings and parts to complete hookup:	inc.
Labor:	inc.
Total estimate:	<u>\$1595.00</u>

This is a less expensive system, however it does create more backpressure on the pump and does not conserve energy as the pump will run near continuously and with above mentioned backpressure.

Any Question call above numbers:

Thanks, Jack Young
