Additional hydropower project information: N/A

Additional fish propagation project information: N/A

Appropriation Rule 40.05.c information: N/A

Mitigation Plan or acceptance form: N/A

Evidence of Pre-1987 development: N/A

3. cskinner 12/14/2004 Legal Notice Remarks

Comment: Application proposes the drilling of a new well to provide water for a fire protection system for a new office building. The well and office building are to be located along the east side of Highway 93 approximately 2.1 miles north of the Highway 93 and Interstate 84 interchange.

4. cskinner 1/31/2005 amendment

Comment: This day, Dave Parrish of the IDF&G came in and amended this application to correct the POD & POU legal description from the SENW to the SWNW. The slight change in description should not require a readvertising of the application.

5. ameritt 2/1/2005 Recommendation

Comment: This application was processed and advertised without protest. The application initially listed the SENW but after advertising on inspection it was questioned whether this description was correct. On further investigation it was determined the actual description should have been the SWNW or approximately 600 feet further west. This change is reflected in the draft approval. It is recommended the

application not be re-advertised since the location is close enough and no significant issues have been identified. Essentially the well will only be used for fire protection.. Recommend approval as drafted including latitude being given to Watermaster of WD130 to determine need for data logger. Draft is located on A012.

6. kwalker 2/14/2005 Permit Review

Comment: Application falls within ESRPA, Trust Water Area, North Snake GW Dist., West water msmt. district and WD130. Use will only be consumptive when there is a fire. Recommend approval as drafted by region.
