

November 13, 2003

To Whom It May Concern:

Rights 45-2693 and 45-2713 are from waste water (unnamed streams) that have been collected and used in the same distribution pipelines as the right 45-12774 from ground water and other rights from ground water. More recently the waste water has not been available for use but if land use changes these waters will again be collected and commingled with waters from ground water for distribution within the common pipeline network that covers approximately 1322 acres.

If SRBA recommendations acknowledge the historical use of these waste waters in this common system I will withdraw transfer 5404 (66824).
