Re: Water right transfer – David and Rebecca Tupper
Project No. 823-01-2005

Dear Allen:

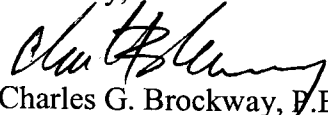

Enclosed is an Application for Transfer to change the irrigation portion of two overlapping rights to commercial usage in a water bottling facility. The commercial use was assumed to be 100% consumptive. The per-acre volume transferred is based on the Allen & Brockway consumptive irrigation requirement for pasture at the Bliss station. Using this data, the transferable volume is 3.2 ac-ft/acre.

Included with the application are warranty deeds showing ownership and an affidavit of the owner verifying that the crop on the subject property has historically been pasture. One of the rights is presently in the name of Robert and Faye Tupper. A quitclaim deed is enclosed transferring ownership to David and Rebecca Tupper. You will notice that David has power of attorney for Robert, a copy of which is also enclosed.

As an unrelated transaction, permit 36-8798 is being assigned from David J. Tupper to Faye L. Tupper. The appropriate form is enclosed.

Please let me know if you need anything further.

Cordially,

Charles G. Brockway, P.E.
