

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 97-07438

Priority: July 12, 2004

Maximum Diversion Rate: 0.02 CFS

This is to certify, that RICHARD GREEN And CAROL GREEN
809 E THIRD AVE
ODESSA WA 99159

has applied for a permit to appropriate water from:

Source: PRIEST RIVER

Tributary: PEND OREILLE RIVER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	04/01 to 10/31	0.02 CFS

LOCATION OF POINT(S) OF DIVERSION:

PRIEST RIVER SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 24, Twp 56N, Rge 05W, B.M. BONNER County

PLACE OF USE: IRRIGATION

Twp Rge Sec	NE				NW				SW				SE				
	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	Totals
56N 05W 24																.5	.5

Total Acres: 0.5

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **April 1, 2007**.
2. Subject to all prior water rights.
3. Point of diversion and place of use are located within Lot 3, Blk. 1, Priest River Estates Subdivision.
4. This right when combined with all other rights shall provide no more than 0.02 cfs nor more than 1.5 afa at the field headgate for irrigation of the land described above.
5. Water shall not be diverted under this right when flows in the Priest River are below established minimum flow amounts.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of

the Director, affixed at Boise, this 15th day of March, 2005

Amount for purposes from to (both dates inclusive)
(cfs or acre-feet per annum)
Amount for purposes from to (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) 0.02 and/or (b)
cubic feet per second acre feet per annum
6. Proposed diverting works:
a. Describe type and size of devices used to divert water from the source 2-3HP Pump with 2" water pipe to river and 1-1/4" PVC Pipes to sprinkler heads, digital timer.
b. Height of storage dam feet; active reservoir capacity acre-feet; total reservoir capacity acre-feet
c. Proposed well diameter is inches; proposed depth of well is feet
d. Is ground water with a temperature of greater than 85°F being sought?
e. If well is already drilled, when? ; Drilling firm ;
Well was drilled for (well owner) ; Drilling Permit No.
7. Time required for completion of works and application of water to proposed beneficial use is 2 years (minimum 1 year)
8. Description of proposed uses (if irrigation only, go to item 9):
a. Hydropower; show total feet of head and proposed capacity in kW.
b. Stockwatering; list number and kind of livestock.
c. Municipal; show name of municipality.
d. Domestic; show number of households.
e. Other; describe fully.

3. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

RE: Permit No. 97-7438

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a 'Proof Due Notice' approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Please note that a separate stream channel alteration permit must be obtained from the Department prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed a least sixty days prior to the commencement of work in the stream.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-287-4947.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen". The signature is written in black ink and is positioned above the printed name.

Shelley W. Keen

Water Rights Supervisor

ODESSA WA 99159**

**Kari Lynn Townsend
Secretary**

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Memorandum to file

Date: March 10, 2005

From: Beardslee, Haynes 

RE: 97-7438

The applicant has indicated that the source of water for this filing is influenced by pooled water from the Albeni Falls Dam on the Pend Oreille River.

Northern Region recommends approval of this filing, with a condition that it is subject to the Priest River Minimum Stream Flow Water Right.

RE: Application for Permit 97-7438 & ALL Applications in MSF areas

Date: February 10, 2005

RECEIVED
FEB 28 2005
IDWR/North

.....

This application was received in our office last week and in review I found that it proposes a diversion in the reach of the minimum stream flow (MSF) on the Priest River. I proceeded to send it up to Bill Graham for review and then discussed with Shelley. We decided that we should return the application to you to finalize the review before we try to go any further with it.

I have attached copies of 3 reviews we have done down here on applications that are within a MSF reach area. Before preparing any permits of this type for approval, we need to make sure water is available for appropriation within the reach of the stream the applications fall within. We also need confirmation, in the file, that the applicant is aware of the MSF and that they will have to shut off their diversions if the minimum flows are not being met. This can be done by way of correspondence with the applicant as done on the 3 examples we have attached, or by documenting a conversation with the applicant.

Please finalize the review of this application and once you have determined that water is available and the applicant has been advised you can return it to us for finalizing. Call or e-mail if you have questions. Thanks.

Via email to Dianne Ball:

REFERENCE: 97-7438; RICHARD & CAROL GREEN

We have reviewed the above named application to withdraw .02 cfs from Priest River, a tributary of Pend Oreille River, for irrigation from March 15 to November 15.

We have no specific objections; however water lines and pumps are an encroachment in lakes and rivers, which can be detrimental to fish and fish habitat.

If a line and pump are placed in the creek and excavation is necessary, we recommend that applicants be required to install the lines during low water when underwater excavation will be minimized. Dug materials should be sidecast to only one side and the bottom contour and substrate restored. The pump should be screened to prevent entrainment of fish; the maximum screen mesh size should be 0.25 inches. In addition, pump approach velocities should not exceed 0.5 ft/second to prevent losses of juvenile fish. It would be preferable to place pumps on land rather than in the water.

The applicant should obtain necessary encroachment permits from Idaho Department of Lands before installing water lines and pumps in state waters.

Thank you for the opportunity to comment.

RE: Application for Permit No 97-7438

Dear Applicant(s):

The Department of Water Resources acknowledges receipt of your water right application. Please refer to the above referenced number in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the Priest River Times on October 6 and 13, 2004. Submittal of protests to this application will be allowed for a period ending ten days after the second publication.

If the application is protested you will be sent a copy of the protest(s). All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in Boise for final processing. The State Office will notify you of any action taken on the application and will send you a copy of the permit if approved. A typical processing time for an unprotested application is about eight to twelve weeks.

Please feel free to contact this office if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Allen Beardslee".
