RE: Water Right Permit No. 78-07301

Dear Mr. Townsend:

As discussed in our telephone conversation yesterday, I have enclosed copies of Permit 78-07301. Based on the field examiner's report, the points of diversion were developed differently than described on the permit. The permit allows for one point of diversion but two points of diversion were actually developed.

By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee by September 6, 2004.

I have also changed the database entries to reflect your current address.

If you have any questions, please call me at (208) 327-5452.

Sincerely,

A handwritten signature in black ink, appearing to read 'ER Retelle', written over a horizontal line.

Erin Retelle  
Water Resource Agent
