1. kwalker 9/16/2004 Measuring Device

Comment: Dan Smith, Watermaster of Water District 74-W, called me this afternoon regarding this water right. Ms. Edwards has rebuilt her headgates and weirs and is now in compliance with the condition requiring a measuring device be installed and maintained. Mr. Smith had been on site and inspected the work that had been done and has no problem with us issuing the water right license for this permit now.

2. kwalker 8/14/2004 Measuring Device

Comment: Today I called Dan Smith, Watermaster of Water District 74-W regarding this permit. He said there are no diversions downstream from Ms. Edwards diversion at this time. He had a meeting with her the Saturday before our conversation and she intends to fix her existing headgate and install measuring devices as required by the permit and the water district. Mr. Smith said he would call me and let me know when the work was completed.
