July 8, 2004

To Shelly Keen
Dept Water Resources, Water Rights Supervisor,
P.O. Box 83720, Boise, Idaho 83720-0098

This letter is a request to reconsider to amend Water Right License #83-07112, March 10, 1999 for the following reasons.

- 1- The letter mailed to us on March 23, 1999 by Keri Lynn Townsend, we did NOT pick up in Pierce, Idaho until after the time allotted to reconsider, had expired.
- 2- We live 18 miles beyond Headquarters, Idaho over logging roads that are snowed in from mid December to mid April. We only snowmobile out every two to four weeks to get our mail and some provisions as needed.
- 3- After receiving your letter of approval of 83-07112, I sent a response to you asking to change the .15 CFS for power to the 1 CFS that our permit to appropriate water stated. The date of this letter indicated you received it in StateHouse mail, May 21, 1999.
- 4- Our beneficial use of the Hydro System has been from a high of .5 CFS to .08 CFS as Lewis Creek permits. Our need has not been to use more than .5 CFS.
- 5- With our 10 KW generator and our 2 nozzle system we are capable of 1 CFS, but our beneficial use has been for .5 thus far.
- 6- Mr. Kenneth Knoblock visited the site on July 7, 2004 and agreed that the .15 CFS was too low. We talked about a beneficial use of .5 CFS that would fulfill our needs.

I request that you reconsider and amend Water Right License # 83-07112 from .15 CFS to .5 CFS as this would meet our beneficial use for Power purposes.

Thank you very much,
Lane Weimer
