1. eretelle 10/13/2004 annual volume

Comment: The pond with surface area of 2 acres lies in an area where water evaporates ~35 inches/year (transfer memo) and receives precipitation of ~25 inches/year. 2 acres x 10 inches = 1.7 af/year lost to evaporation. This was added to the pond volume (4.7 af) to get the annual volume (6.4 af).

2. DBALL 10/22/1997 DIVERSION DESCRIPTION

Comment: Flooding lowland for wildlife enhancement. Dikes will be used for storage control. Storage height 5'; active capacity 20 AF, total capacity 25 AF.
