Re: Permit No. 47-7923

Gentlemen:

We are in the process of reviewing the above permit for licensing purposes and find that we need additional information concerning your use of water from the well.

We need to know how the well is used for stockwater in conjunction with your Twin Falls Canal Company water.

1. Do you use your Twin Falls Canal Company water to water the stock when you are not diverting irrigation water from the well?
2. Do you divert stockwater from the well in the winter?
3. Do you divert at full capacity in the winter or throttle the well back to the amount actually needed? Where does the unused water go if you do not throttle the well back?

Please submit responses to the above questions so we can proceed with license review of this permit. The Department will hold further review of your permit for 30 days to allow submittal of the requested information. If we don't receive a response within the 30-day period we will limit your stockwater use to the non-irrigation season and those times when the canal company water is not available. Your assistance in this matter will be appreciated. If you have any questions, please feel free to contact me at (208)327-7944.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
