RE: Lapse Notice – Permit No. 95-9082

Mr. Saxton:

The Greenferry Water & Sewer District is in the process of organizing past records. During this process, it has come to our attention that correspondence from you dated October 8, 2002, regarding the lapse of Permit No. 95-9082 was never brought to the Board of Director's attention, and thus never acted upon in a timely manner. We have also been made aware that a certified letter dated July 31, 2002, from your office was never claimed at the post office and thus returned.

The District has completed the installation of the pump and the well is operational. Under the current permit situation, the two wells cannot be operated at the same time. We are requesting the water rights be re-established for both wells. Please advise us how we may file the necessary paperwork to achieve this.

Sincerely,

David Muncey, Chairman

CAG/bmc
