

Comment Report

25-7418

1. dcarlson 5/11/2004 Field Report Narrative

Comment: 6 wells/pump to homes under the Falls Water company service area. They are considered a Municipal provider and the nature of use for this water right will be minicipal.
capacity of the system is over 11 cfs. Each well was measured by the Eastern Groundwater measurement district.

2. kwalker 6/8/2004 License Review

Comment: Confirmed that Falls Water Co. is authorized to do business in Idaho per Secretary of States office this day. Have a call in to DEQ to verify that Falls Water Co. has a PWS number and are qualified as a public water supply provider. Removed limitation on rate of diversion when combined with Licenses 25-7191 and 25-7148 because the 3 rights when combined do not exceed capacity of 12.20 cfs found to be diverted. Also did not include remark showing other rights diverted at these points of diversion since those rights are only claims at this time. See p/d overlap search in file. Also limiting this right with a volume amount since use was originally domestic and irrigation. The rate $\times 1.9835 \times 365 \text{ days/year} = 723.98$ rounds up to 724.0 afa which is less than the amounts that would be applied if figured domestic and irrigation uses independently.

3. kwalker 6/9/2004 DEQ compliance

Comment: Willie Teuscher of DEQ in Idaho Falls called me this morning. He said that Falls Water Company is under their jurisdiction and they are in compliance. The PWS number for Falls Water Company is 7100030.

Subject: Amendment for 25-7418

AmendmentLicense

_.rtf

Dave: Here's the licensing amendment for Falls Water Company - you mentioned that you could get the amendment from them once I had it prepped. Please look this over and let me know if you agree or disagree with what I have done before getting the signature and \$50.00 filing fee. You can go into adhoc and look at comments if you can't figure out what I have done... Thanks. Kay
