

MEMORANDUM

DATE: October 19, 2004

TO: Water Right 22-13155

FROM: Shelley W. Keen 

RE: Irrigation of the common area in the subdivision

Today I had several conversations with Scott Shepherd (307-739-8011) about his need to find a source of water to irrigate the small park in the subdivision. In our final conversation he told me that he would drill a shallow well, about 42 feet, and divert up to 2500 gallons per day from it under the domestic exemption described in Idaho Code § 42-111(1)(b).

Mr. Sheperdson and I also discussed the conditions requiring him to continue to use the surface water appurtenant to the subdivision when it is available.
