1. kwalker 10/25/2004 Place of Use

Comment: I did not find the place of use for stockwater or domestic listed on the application form but it was included on the advertisement of this application. I used the advertised places of use for domestic and stockwater after discussing with Dennis Dunn at Eastern. Also found an error in describing the irrigation place of use. Application shows irrigation occurring in N1/2SW but that land is actually located in N1/2SE and NESW, with no irrigation in SESE of same section. Since there are no overlapping irrigation rights in this area and the application was advertised without protest I recommend change to legal description for irrigation and recommend approval.

2. kwalker 10/25/2004 Irrigation Season

Comment: Region advertised irrigation season as 4/15 to 10/31 even though application shows 4/1 to 10/31 which is the standard for the area. Recommend standard season for irrigation use.
