1. kwalker 1/19/2005 Permit Review

Comment: During initial review of this application I found an overlap with App. 15-7221. That application was withdrawn and cleared from our records. I also inquired about the use of surface water on this property. I was told there was no irrigation water from Samaria on these lands. Therefore, there is no place of use overlap. Use does not fall within any problem areas in the state. Recommend we approve this application.
