RE: Permit No. 36-08491

It has been brought to my attention that proof of beneficial use for this water right has not been completed. In April of 1990, I opened a new dairy and was confused on beneficial use for those permits.

Permit #36-08491 is for an existing facility that has been in use continually since October of 1981. Would you please allow me to reopen this permit and prove beneficial use. If you need additional information, please let me know.

Thank you,

Neil DeWit
