Data Review and Investigation:

This license was based on an in-office review of BLM records. The application for permit described the well in the SWSW, S3, T01N, R28E. After review, the point of diversion was amended and licensed in the NESW. BLM objected to the SRBA recommendation of this license.

BLM has provided GPS data to support their objection, showing the location of the well in the SESW, S3, T01N, R28E. There is no other water right record at this location. It is recommended that license 35-9040 be amended to more accurately describe the location of the point of diversion in the SESW, S3, T01N, R28E.
