

MEMORANDUM

Date: January 26, 2005
To: Transfer 71708 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Transfer application proposes changing the recorded place of use for the power portion of water right 72-2068 (10.00 cfs) from approximately 0.35 miles north of Clayton to approximately 1.5 miles north of Clayton to the Clayton Mine site. The water is proposed to continue to be diverted from existing diversion points from Kinnikinic Creek. The transfer was filed by the applicant to resolve the BLMs objection in the SRBA by removing the power right POU off of BLM ground.

- **Authority to File:**
IDWR records show the applicant as current owner of the right involved with the transfer.
- **Water Right Validity:**
The base right for the transfer is based on an SRBA recommendation and appears to be a valid right.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None if appropriate conditions and limits are implemented.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
