Dear Ms. Malcolm:

Reviewing your claim to a water right we note in the remarks in Item 8, at the top of page 2, we can only accept the claim for stockwater with a 1936 priority. The amount of water you can claim for stockwater is based upon the number of animals using the water (see attached rate of gallons per day per each animal and a conversion table to convert total gallons per day to cubic feet per second c.f.s.)

It will be necessary for you to file an application for permit for the water used for irrigation, as you stated in Item 8 further development was made of the spring in May, 1976, and the flow was now approximately 1.00 c.f.s. We can not accept claims on surface water sources that were perfected after May 20, 1971 (see item 4 on the claim to a water right form.)

Therefore, we have returned your claim to a water right and check No. 92-286 in the amount of \$10.00 with new claim forms and an application for permit with instructions. The fee schedule is on the fourth page of the instructions.

If you feel you need assistance in this matter, please feel free to contact me.

Please find enclosed the claim to a water right that you submitted to this office on September 13, 1976.

For a claim to be of any value, it is necessary to give the legal description of the point of diversion in Item 5a. If it is diverted at the springs, then the location of the springs will be the point of diversion. If the springs flow into the reservoir you described and then are diverted from this reservoir, then the location of the reservoir should be described in Item 5a.
