RE: APPLICATION FOR TRANSFER ON WATER RIGHT 63-31590

Dear Mr. Nelson:

Per our meeting on 2/23/2005, I feel it would be in my best interest to only request the remaining portion of the water rights after the current splits from water right 63-9655 as proposed by previous transfers. Whereas my water right is supplemental to my canal water, I feel this amount of water would satisfy my needs when I combine my well use with the canal water.

This will in no way reduce the other water users holding splits of the original water right as they have applied for them. The reasoning behind taking the reduced amount is to prevent any conflict or protests from the other water users holding splits on this water right. I also understand that once the transfer is approved that I will not be able to come back at any future date and request the original amount of water be re-instated.

Respectfully,
