**Data Review and Investigation:**

This license was based on an in-office review of BLM records. The water right was recommended as licensed in the SRBA. BLM objected to the recommendation.

After the objection, IDWR originally received GPS data from BLM that consisted of 19 points gathered while walking the perimeter of Cabin Pit reservoir. The data was collected on June 25, 1996. This data was rejected as being inconsistent with IDWR's GPS data collection standards.

BLM has now submitted GPS data consistent with IDWR guidelines showing the location of "Cabin Pit Reservoir" in the NENE, S10, T03S, R29E. A copy of the layout, a photo of the site, and a copy of BLM's field investigation is attached.

**Recommendation:**

License 35-8644 should be amended to correctly describe the location of "Cabin Pit Reservoir" in T03S, R29E, S10, NENE, based on GPS data supplied by BLM.
