Pam,
The most this well can pump is 3,600 gpm (8.02 cfs). It is acceptable to Simplot if you want to condition the transfer limiting this well to 8.02 cfs.

Subject: 71741 Transfer - Clarification

Hello Vic,

I received your letter of 02-16-2005 this morning and just wanted to clarify your intent regarding the well in the SESE, Sec 35, T06N, R29E. You have identified the capacity as 8.02 cfs. Since this transfer proposes to correct the legal description of this one well, we could process the transfer using the identified rate from that well as the transferred amount. This would adjust the fee to a lesser amount than associated with the total of all the water rights, and the appropriate refund would be requested on your behalf. We would also add a condition to all the rights in the transfer limiting the maximum diversion rate from the corrected well to 8.02 cfs, as you have identified.

If you would rather not have the well limited to this specific diversion rate, we will proceed using the original transfer total of all the rights. No diversion limit would be applied to the well and no fee adjustment would be made.

Please reply by written response (e-mail or letter) and let me know which direction you would like us to proceed. Call me if you would like to discuss this further or have questions. I will withhold the transfer from further processing until I hear from you on this matter.

Sincerely,

Pam Skaggs
