RE: Application to change point of diversion for 75-4101M

Dear Mr. Wilson,

Per your letter dated November 16, you asked us questions concerning the lots where usage would be for our water rights. In a telephone conversation with you, we were able to clear up the question. But, a new question arose. You asked us to prove a priority date of water rights as far back as we could go. Going to the office you suggested, we were able to acquire an aerial photo dated October 29, 1939 of the 10 Mile Ranch showing cultivation of the whole valley.

This should settle any questions of water usage for the area as far back as October 29, 1939. Please accept this information and apply it to all the properties in the subdivision called River Edge Ranchettes.

Sincerely,

Frank Flores

June M. Flores
