The Mission Creek Water Association abandoned the surface water facility in 1998 when we converted to ground water in compliance with the voluntary consent order issued to us in 1993. The well/ground water system went online in July 1998. At that time, the surface water intake on Mission Creek was abandoned and the distribution piping was cut and capped. We request a waiver to use surface water. Permit 98-7613 is no longer needed.

Will Parker
Acting Secretary, Vice President, Maintenance
Mission Creek Water Association
