Re: Reason for amendment

There was no land owned by the Kramers in Lot 8 as shown in ArcView and the shapes of the lots did not look quite right. I called the assessor's office to search for the Kramer property and I was told they had a piece of land in Lot 9. I confirmed this in ArcView and changed the PoD and PoU to reflect reality. The field examiner reported Lot 8 as well, but there is no indication of method of determination - I suspect it was just copied from the permit.
