1. kwalker 7/13/2004 Source Name

Comment: In review of this permit for licensing I found the source under this right should be unnamed stream rather than Olds Creek. Pursuant to review of topo A7 the source is unnamed. During a phone conversation with the permit holder today he stated that the source is named Olds Creek on a USFS map the regional office used in assisting him file. In review of other rights on this creek the source is shown as Trow Creek. The permit holder stated that Trow Creek came from Trow Creek Water Users Association that is located in the area. For this right, I recommend we use unnamed stream as per data entry standards with a remark that the source is known locally as Trow Creek or Olds Creek.

2. kwalker 7/13/2004 Water use

Comment: In preparing license for this right I noticed that there was a recreation from storage use under this permit. I had not seen this use in action before and do not think it was necessary for this right so have removed it from proposed license. I called the permit holder today and found that he uses his pond recreationally for fishing and swimming purposes. These uses do not require a recreation from storage parameter.

3. kwalker 7/13/2004 Overlapping Rights

Comment: While talking with the permit holder today I asked him if he had purchased his property from Donald Wright. He stated that he purchased from another party who had purchased from Mr. Wright. I asked him if he was interested in Mr. Wrights 1933 claim 98-4247 which appeared to be located on permit holders property. He said he would be glad to submit a change in ownership form on the older right. I am sending him a copy of the claim and an ownership change form. Since 98-4247 is a claim and has not been substantiated there should not be a problem in regard to overlap conditions.

4. STYPA 3/27/1993 DIVERSION DESCRIPTION

Comment: 5 ft. high dam with active reservoir capacity of 8 A/F. Total reservoir capacity is 8 A/F.

5. VAULT 4/7/1998 Proof of Beneficial Use Rcvd

Comment: Proof of Beneficial Use Rcvd
