

MEMORANDUM

Date: November 3, 2003
To: Transfer 70705 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

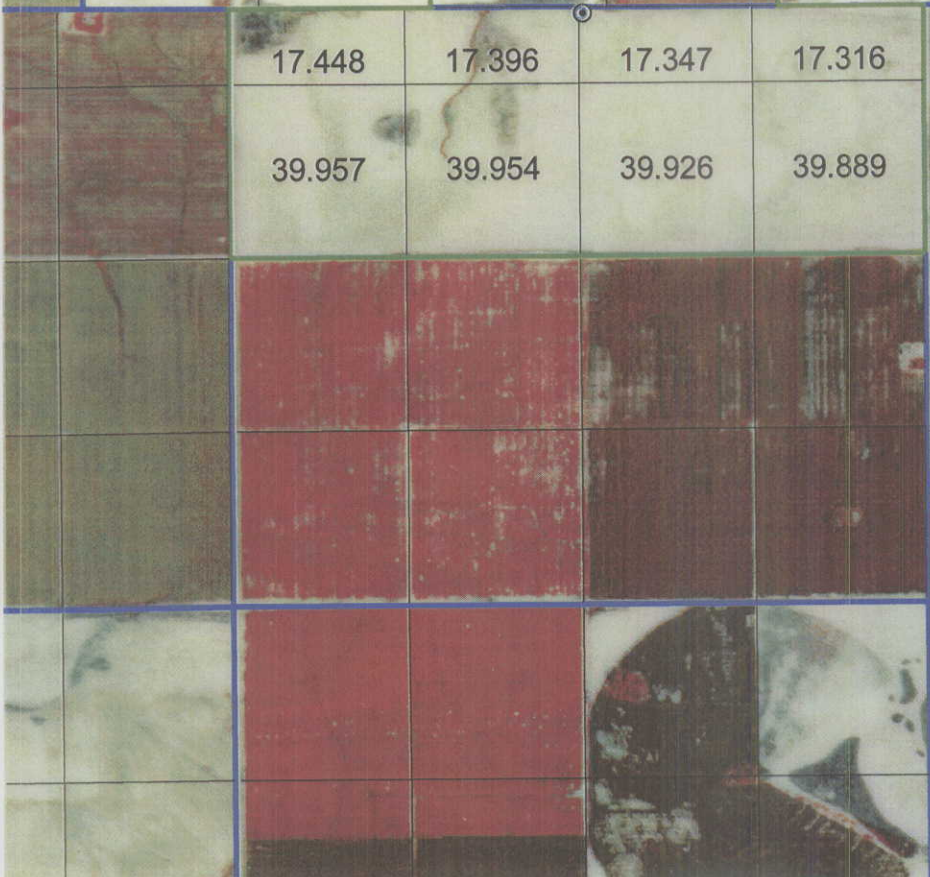

Transfer proposes changing the permissible place of use for three groundwater rights totaling 6.76 cfs and used to irrigate a farm located approximately 15.5 - 17.0 miles north and 3.25 - 4.25 miles east of Rupert. The transfer proposes changing the permissible place of use boundary from 530 acres to 548 acres. Two existing wells located on the farm will continue to be used to supply irrigation water. The rights involved with the transfer have all been decreed in the SRBA. Note that the well in Section 1 should be described in the SWNWNE ¼ rather than the NWNWNE ¼ of Section 1 as listed on the decree. The approval has been drafted to reflect this correction and the applicants consultant was made aware of the proposed correction.

- **Authority to File:**
Applicants are listed as the current owner of the rights involved with the transfer.
- **Water Right Validity:**
Rights involved with the transfer have been recently decreed in the SRBA.
- **Injury to Other Water Rights:**
None anticipated. Transfer proposes adding acres to PPU boundary.
- **Enlargement of Use:**
None apparent
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
No negative impacts anticipated. Sprinklers used for irrigation

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
