Re: Application for Transfer No. 5180

Dear Mr. Price:

Thank you for meeting with Jim Johnson, Ed Squires and me on May 15, 1998. The purpose of the meeting was to determine how the present pumping capacity of Capitol Water Corp. could be determined to properly condition transfer no. 5180 when it is approved. After discussing several alternatives, we determined because Capitol Water Corp has not significantly expanded its service area, that the capacity, under pressure, should be measured this summer with a new no. 7 well operating and the old no. 6 well not operating. You should measure the flow from all of your wells during a peak production time in the summer of 1998. This peak flow rate should be reported to the Department of Water Resources prior to September 1, 1998. Upon reporting the peak capacity, the department will finish its review of application for transfer no. 5180.

Thank you for your assistance.

Sincerely,

A handwritten signature in cursive script that reads "Gary Spackman".

Gary Spackman
