1. E Retelle 12/10/2004 x42

Comment: Condition x42 is typically dated 10 years from submission of Beneficial Use. That was in 1998. There is no direct guidance in memos or Code, so I dated it 10 years from the field exam date.

2. E Retelle 12/20/2004 measuring device

Comment: I prepared an order removing the measuring device requirement for the outlet of the system. The requirement still exists for the device at the PoD and will need to be complied with if they start using water before the license lapses.
