Picabo Livestock Company
Application for Transfer of Water Right #37-11628

Supporting Narrative

The proposed water right transfer requests the a change of a point of diversion and an addition of a point of diversion for Water Right #37-11628. Historically the stock water right has been delivered from a groundwater well located in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 27, Township 01 South, Range 20 East, B.M. This well is also the same well which has historically been the main water supply well feeding the Picabo water storage tank and distribution system providing potable water for the residents of Picabo. The well and system are privately owned by Picabo Livestock Company and administered as a public water system. The existing POD has been replaced with a new municipal well located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ and the old well has been disconnected from the system. The feedlots which are adjacent to the storage tank are fed from the tank and system and therefore the point of diversion needs to be changed to reflect the new well.

Also, the Picabo Water System has incorporated a back-up well for use in emergency situations and during maintenance of the main well & pump. This well is located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 27 and is known as the "Porter Well". Since this well is part of the system and may be used at times to supply the stock water right, this well has been added under this transfer as a new point of diversion.

No other changes are proposed under this transfer. No expansion or change of nature of use is proposed. The existing well will be capped and not used unless a viable right is obtained for this well.
